

Democrats Join CyberSecurity Experts

January 1, 2024

It is no secret to anyone in know, Democrat or Republic, that there are major concerns with regard to our computerized election systems. This is the big secret that the political elites don't want the citizens to know. And the Democrats, up until 2018, were screaming the exact same thing Republicans were screaming after 2020. I used to be a Democrat. Before my eyes were opened, I even voted for Obama. This is NOT a D vs R issue. This is a Citizen vs Political Elite issue. We have all been getting played for decades. The political elite Dems went silent in 2018 is because they knew they needed to use these systems to manipulate the 2020 election, so they went crickets and instead began coordinating the destruction of our cities to distract us.

If you know Democrats that have bought the real big lie, show them this video and ask them what they think about it. I have shown it to many Democrats and it definitely helps to crack that shell.
