

Emergency Recommendations

Power

January 10, 2025

Options:

- Battery-based 'Generators'
 - These are just batteries with an attached inverter, and can be charged by plugging them in the wall, or by solar power
 - Can be used INSIDE
 - Silent
 - Either One or Two:
 - One
 - Lightweight, easy to carry (27-60 lbs depending on size)
 - Buy this:
 - Battery-based Generator (buy ONE, on sale right now until Jan 13th for \$499!!!): <https://amzn.to/3Wc5SZ0>
 - **OR** Larger Batter-based Generator (buy ONE): <https://amzn.to/4gFIP1T>
 - Solar Panel (if you want to charge via solar): <https://amzn.to/3DMkQzo>
 - Two
 - Double the power, use two smaller units to make each easier to carry
 - Redundancy – If you have a problem with

one, you have a backup unit

- Buy this:
 - Generator (buy ONE, on sale right now until Jan 13th for \$499!!!):
<https://amzn.to/3Wc5SZ0>
 - **OR** Larger Generator (buy TWO):
<https://amzn.to/4gFIP1T>
 - Solar Panel (buy TWO, if you want to charge via solar):
<https://amzn.to/3DMkQzo>

- Dual-Fuel Generators

- These can run on gasoline or LPG (propane), so it gives you flexibility
- Must be run OUTSIDE
- You can hear them running (they sound like a quiet lawnmower engine, 50-60 db)
- Either One or Two:
 - One Dual-Fuel Generator
 - Lightweight, easy to carry (43-52 lbs)
 - Buy this:
 - Generator (buy ONE):
<https://amzn.to/3PucVJK>

- Two Dual Fuel Generators

- Both can be linked together to provide you with double the power, or use two smaller units to make each easier to

carry

- Redundancy – If you have a problem with one, you have a backup unit
- Buy these:
 - Generator (buy TWO): <https://amzn.to/3PucVJK>
 - *Parallel Link (buy ONE if you want a 30 Amp output using both at same time): <https://amzn.to/40DspBL>*

- Battery-based AND Dual-Fuel – BEST All-Around Solution!
 - You can use SOLAR, GASOLINE, or PROPANE to make power
 - The concept is to use the battery-based unit as your primary, and use the Dual-Fuel to keep that Battery charged in the event that solar power is not enough
 - Either One or Two:
 - One Battery-based AND One Dual-Fuel
 - Buy this:
 - Battery Generator (buy only one of the following):
 - Battery-based Generator (buy ONE, on sale right now until Jan 13th for \$499!!!): <https://amzn.to/3Wc5SZ0>
 - **OR** *Larger Batter-based Generator (buy ONE): <https://amzn.to/4gFIP1T>*

- GAS/LPG Generator (buy ONE):
<https://amzn.to/3PucVJK>

- Two Battery-based AND One Dual-Fuel
 - These can be linked together to provide you with double the power, or use two smaller units to make each easier to carry
 - Redundancy – If you have a problem with one, you have a backup unit
 - Buy this:
 - Battery Generator (buy only one of the following):
 - Battery-based Generator (buy TWO, on sale right now until Jan 13th for \$499!!!):
<https://amzn.to/3Wc5SZ0>
 - **OR** *Larger Batter-based Generator (buy TWO):*
<https://amzn.to/4gFIP1T>

 - GAS/LPG Generator (buy ONE):
<https://amzn.to/3PucVJK>
