This scheme kills the Electoral College without a Constitutional amendment. Once enough states sign on, your state's votes go to whoever wins the *national* popular vote – no matter how your own state voted.

Here is why this is catastrophic:

Every single ballot in America suddenly matters equally in one giant national count. That sounds fair until you realize where massive, organized fraud actually happens – in the big, one-party-controlled cities. Chicago, Philadelphia, Atlanta, Detroit. These are exactly the places where thousands of ballots can be manufactured or flipped in the dead of night with almost no real oversight.

Right now, under the Electoral College, stealing 50,000 votes in a deep-blue city that already goes 80-20 for one side changes nothing. The state is already locked. Under the National Popular Vote, those same 50,000 fake votes move the *national* total by 50,000. Suddenly the payoff is enormous and the incentive to commit industrial-scale fraud goes through the roof.

This turns every urban political machine into a national kingmaker. Rural America, small towns, and red states get completely silenced. Your vote in flyover country becomes worthless compared to the machines in the big cities.

The Founders built the Electoral College for one reason: to stop pure mob rule by big population centers and to force candidates

to care about the entire country. This compact destroys that protection.

This is not reform. This is rigging the game at the national level. And it is happening right now, and it's coming to YOUR STATE if it hasn't already made it there.

Share this before it is too late. Call your legislators in every state. Demand they reject this dangerous compact. It will be the end of the Republic.

MAKE SURE EVERYONE IS AWARE OF THIS.
