sqlmap[®]

Automatic SQL injection and database
takeover tool

; Introduction();--

sqlmap is an open source penetration testing tool that automates the process of detecting and exploiting SQL injection flaws and taking over of database servers. It comes with a powerful detection engine, many niche features for the ultimate penetration tester and a broad range of switches lasting from database fingerprinting, over data fetching from the database, to accessing the underlying file system and executing commands on the operating system via out-of-band connections.

Collin County, TX – Voter list inconsistencies

Here is another example from Collin County where the State added four voters sometime between May 3, 2022 and June 10, 2022. Where did these names come from?

The names have been redacted for privacy. But can be shared with legislators.

35814	3/1/2022		248		3/1/2022		248
35815	3/1/2022		248		3/1/2022		248
35816	3/1/2022		248		3/1/2022		248
35817	3/1/2022		248		3/1/2022		248
35818	3/1/2022		248		3/1/2022		248
35819	3/1/2022		248		3/1/2022		248
35820	3/1/2022		248		3/1/2022		248
35821	Date	ING_PRECINCT		Date	ING_PRECINCT		
35822	3/1/2022		221	ssss	3/1/2022		231
35823	3/1/2022		229	ssss	3/1/2022		240
35824	3/1/2022		231	ssss	3/1/2022		221
35825	3/1/2022		240	ssss	3/1/2022		229
35826				ssss	3/1/2022		59
35827				ssss	3/1/2022		150
35828				ssss	3/1/2022		67
35829				ssss	3/1/2022		67
35830							
35831				left column was 03 May - 2 months after the primary		right side is June 10th	
35832							
35833				this is a list of voters who voted.			
35834							
35835				The state has 2 instances of [redacted] and [redacted] in 2 different precincts - this is possible given name statistics.			
35836				especially since their VUID are different - but it's the 4 names added that is a problem.			
35837				But why were			
35838				these names:			
35839				[redacted]			
35840							
35841							
35842							
35843							
35844							
35845							

Figure 2 comparing 5/3 to 6/10 for the March Primary – 2 duplicates but that might be OK, as it may be possible with suffixes, but there were also 4 names added over 2 months after the election.

Galveston County, TX – Voter list inconsistencies

And this issue does not just occur in Collin County.

Here is a chart from Galveston County. This chart was downloaded from the SOS website on July 2, 2022, and July 24, 2022 (four months after the primary). Notice that there are 2 votes removed from the Official Election Day Voting Information.

Figure 3 – This is 4 months after the election. 2 votes were removed from the OFFICIAL Election Day Voting Information.

The election numbers should be a fixed set of names and VUIDs **at the time of certification**. Why are numbers and names changing months after the election? And who is doing this? Is there something in the system that makes these changes?

These data changes do not appear to be happening at the county level. So what is happening at the State level? The SOS website has a disclaimer that says that they do not alter or modify data provided by the county.

Disclaimer: All information displayed is provided by county election officials. The Office of the Secretary of State does not alter or modify the data provided in any way. For questions related to this information, please contact the appropriate [county election official](#)

According to the above disclaimer, the State doesn't alter any information; therefore, there should NOT be changes at the State level that are not happening at the County level.

Brazos County, TX – Unusual increase in registered voters

Brazos County grows to more than 120,000 registered voters, deadline for voter registration Monday

The deadline is coming up fast to vote for the November Election

By Clay Falls

Published: Oct. 2, 2020 at 7:01 PM CDT

BRYAN, Texas (KBTX) - If you want to vote in the November election and haven't registered yet you're running out of time.

The deadline is Monday, October 5.

Brazos County now has a new record of more than 120,000 registered voters. Elections Administrator Trudy Hancock said Friday they've seen thousands of new voters added in recent weeks. The deadline to register is Monday and you'll need to know your driver's license number or the last four digits of your social security number. You don't have to present an ID to register.

"Every year we see people show up to the polls wanting to cast a ballot and they can't because they haven't registered and that's why it's very important to register before Monday," said David Hilburn, Chair of the Republican Party of Brazos County.

He said their office is getting lots of calls.

"It's been a big uptick of people registering and whether that's just because of the presidential year or whether it's because of this specific election I don't know. You know as our population grows, it's natural to get people to move in. The numbers are going to go up," Hilburn added.

NBC News asked the two other major manufacturers how many of their tabulators with modems were currently in use. Hart said that it has approximately 1,600 such tabulators in use in 11 counties in Michigan. Dominion did not respond to numerous requests from NBC News for their sales numbers.

'Vulnerable to hacking'

With the 2020 presidential election only ten months away, Appel and Skoglund believe all modems can and should be removed from election systems.

"Modems in voting machines are a bad idea," said Appel. "Those modems that ES&S [and other manufacturers] are putting in their voting machines are network connections, and that leaves them vulnerable to hacking by anybody who can connect to that network."

POLITICS

Modems removed from voting machines in five N.C. counties

Key Objectives for this report were answered by this examination:

1. To determine whether D-Suite-implemented security requirements comply with the 2002 Voting System Standards (VSS)
 - a. Uncertified software was used on the system rendering the certification of the entire system and all elections conducted with it, Invalid.
 - b. Security protections required by law were almost completely absent
 - i. Other than a userID and an easily guessed or bypassed password, no authentication was required
 - ii. The firewall rule for access to the election database, ballots and results was unrestricted to any IP address in the world
 - iii. Together with the firewall rule, Microsoft SQL Server Management Studio (SSMS) enabled complete access to the entire election databases – not just to the 2020 election but to the elections of June 2019 through May 25, 2021.
 - iv. A self-signed encryption certificate was used introducing the potential for a man-in-the-middle attack
 - v. Thirty-five wireless devices (802.11, Wi-Fi) were installed inside election equipment and an additional wireless device was identified in a connected printer
 - vi. Any or all of these wireless devices could have connected to the Internet via the building wireless facilities
 - vii. “Purging” (deletion) of critical Audit Log data, as specified by DVS and directed by the Secretary of State⁷⁵, destroyed all records of connection to the Internet or elsewhere, all record of user activity, including programs run by these users, errors, and any record of the addition or deletion of votes and the alteration of election results.
 - c. **EACH of the compliance failures identified in 1.a. and 1.b. above are clear violations of the law.**

DEMOCRATS JOIN CYBERSECURITY EXPERTS IN WARNING C
VOTING MACHINE VULNERABILITIES BEFORE 2020 ELECTION

© 2023 Mark Cook

“We pay to have our system penetration tested, hacked, basically, to find out are there weaknesses and what can we do to, to fix those weaknesses, right, to make it less hackable.”

Pete Lichtenheld

Senior Vice President of Customer Success at Hart InterCivic

“And I'll fully admit and anyone who says something's not hackable is a fool, so anything can be hacked, right? but it takes access to the thing, knowledge, and mostly time.”

ACCURATE. RELIABLE. TRANSPARENT.

**DOMINION
SECURE**

Dominion Voting Systems is committed to ensuring the security of elections.

We utilize both voluntary and compulsory testing on every one of our systems as part of company and federal/state certification processes. Our Democracy Suite products have been tested and certified by the U.S. Election Assistance Commission (EAC) in accordance with federal Voluntary Voting Systems (VVSG).

**PRODUCT SECURITY
HIGHLIGHTS**

VVSG testing & EAC certification process

Comprehensive, non-alterable audit logs

Secure software development in accordance with federal guidelines for voting systems (VVSG)

Encryption protections

Multi-factor authentication features

Physical security seals and locks

Software independence - producing an auditable, paper record

Full auditing capabilities

November 18, 2014

Conclusions

While the 4.14.A.1 build of the Democracy Voting System proved to mitigate four previously enumerated vulnerabilities, multiple medium and high vulnerabilities still exist within the suite of systems. A remote user could leverage most of the vulnerabilities across the network to obtain information about the system, voter ballots and results, or gain remote access to the system.

If remote access is gained, recovery of user credentials through system memory (RAM) analysis could be executed and used to modify the backend database of the EMS Server.

KEN PAXTON
ATTORNEY GENERAL OF TEXAS

May 14, 2020

Mr. Keith Ingram
Director of Elections, Texas Secretary of State
Elections Division
P.O. Box 12060
Austin, Texas 78711-2060

Re: Hart Verity 2.4 Voting System—Examination April 13-17, 2020

Dear Mr. Ingram:

Pursuant to Texas Election Code §122.036 and 1 Texas Administrative Code §81.60, by this letter I am transmitting my examiner's report for the Secretary of State's April 13-17, 2020 voting system examination. The subject of that examination was Hart Verity 2.4 voting system.

The factual background for this report includes Hart's presentation to the examiners during an examination at their headquarters, statements made by Hart's representatives during that examination, and any e-mail answers to the examiner's follow-up questions sent by Hart to the Secretary of State's office and then forwarded to the examiners.

The Office of the Attorney General notes that the United States Election Assistance Commission certified Verity 2.4 on February 21, 2020 as a modification to Verity 2.3, which has been previously certified for use in Texas elections. Verity 2.4 consists of multiple components, including hardware and software components.

Both during and after the examination, the examiners raised specific concerns about legal compliance of Verity 2.4. Notwithstanding these concerns, proper procedures concerning the use and operation of Verity 2.4 would help ensure compliance with applicable laws and rules. Therefore, after a thorough review of the system, the Office of the Attorney General concludes there are no legal compliance issues with Verity 2.4 and recommends certification consistent with this report.

Sincerely,

Lesley French
General Counsel

cc: Charles Pinney, Secretary of State's Office

KEN PAXTON
ATTORNEY GENERAL OF TEXAS

February 8, 2021

Mr. Keith Ingram
Director of Elections, Texas Secretary of State
Elections Division
P.O. Box 12060
Austin, Texas 78711-2060

Re: Hart Verity 2.5 Voting System—Examination January 4-8, 2021

Dear Mr. Ingram:

Pursuant to Texas Election Code §122.036 and 1 Texas Administrative Code §81.60, by this letter I am transmitting my examiner's report for the Secretary of State's January 4-8, 2021 voting system examination. The subject of that examination was Hart Verity 2.5 voting system.

The factual background for this report includes Hart's presentation to the examiners during an examination at their headquarters, statements made by Hart's representatives during that examination, and any e-mail answers to the examiner's follow-up questions sent by Hart to the Secretary of State's office and then forwarded to the examiners.

The Office of the Attorney General notes that the United States Election Assistance Commission certified Verity 2.5 on September 9, 2020 as a modification to Verity 2.4, which has been previously certified for use in Texas elections. Verity 2.5 consists of multiple components, including hardware and software components.

Both during and after the examination, the examiners raised specific concerns about legal compliance of Verity 2.5. Notwithstanding these concerns, proper procedures concerning the use and operation of Verity 2.5 would help ensure compliance with applicable laws and rules. Therefore, after a thorough review of the system, the Office of the Attorney General concludes there are no legal compliance issues with Verity 2.5 and recommends certification consistent with this report.

Sincerely,

Lesley French
Chief of Staff

cc: Charles Pinney, Secretary of State's Office

FINDINGS

Following are the findings, based on written evidence submitted by the Vendor in support of its application for certification, oral evidence presented at the examination, and the written reports of the voting system examiners (all of whom recommended certifying the Verity Voting 2.4 system for use in Texas elections).

The Verity Voting 2.4 system, including its hardware and software components, meets the standards for certification as prescribed by Section 122.001 of the Texas Election Code. Specifically, the Verity Voting 2.4 system and its components, among other things:

- Preserve the secrecy of the ballot;
- Are suitable for the purpose for which they are intended;
- Operate safely, efficiently, and accurately and comply with the voting system standards adopted by the Election Assistance Commission;
- Are safe from fraudulent or unauthorized manipulation;
- Permit voting on all offices and measures to be voted on at the election;
- Prevent counting votes on offices and measures on which the voter is not entitled to vote;
- Prevent counting votes by the same voter for more than one candidate for the same office or, in elections in which a voter is entitled to vote for more than one candidate for the same office, prevent counting votes for more than the number of candidates for whom the voter is entitled to vote;
- Prevent counting a vote on the same office or measure more than once;
- Permit write-in voting;
- Are capable of permitting straight-party voting; and
- Are capable of providing records from which the operation of the system may be audited.

CONCLUSION

Accordingly, based upon the foregoing, I hereby certify Hart InterCivic's Verity Voting 2.4 system for use in Texas elections.

What Audit?

Partial Manual Count

The Partial Manual Count (PMC) is a post-election audit of the electronic voting system used in an election to ensure the accuracy of the tabulation of the votes. The PMC involves a manual count of all the races in at least one percent of the election precincts or in three precincts (whichever is greater) in which the electronic voting system was used.⁴⁹⁰ The PMC must be conducted after every election that uses paper ballots that are counted with an electronic voting system. As a general rule, the general custodian of election records shall select the precincts at random. However, in the general election for state and county officers, primary election, or election involving a proposed amendment to the state constitution or other statewide measure submitted by the legislature, the Secretary of State shall select the precincts to be counted in the PMC.⁴⁹² For counties that participate in the Countywide Polling

Group asks BI: Stop Smartmatic, Comelec people from leaving PHL

By VIRGIL LOPEZ, GMA News

Published June 4, 2016 3:49pm

A poll watchdog group has asked the Bureau of Immigration (BI) to prevent 10 people from leaving the country for their alleged role in the controversial script change in the Comelec transparency server that receives precinct-level votes.

In a letter dated June 2, election watchdog "Mata sa Balota" urged BI Commissioner Ronaldo Geron to issue a hold departure order (HDO) against the following personalities:

advertisement

- Cesar Flores -Smartmatic-TIM president for Southeast Asia
- Heider Garcia- Smartmatic official
- Marlon Garcia - Smartmatic Philippines project manager
- Elie Moreno - Smartmatic project director
- Neil Banigued- Smartmatic technical support member
- Mauricio Herrera - Smartmatic technical support member
- Andres Kapunan- Smartmatic Mindanao
- Rouie Peñalba- Comelec IT personnel
- Nelson Herrera - Comelec IT personnel
- Frances Mae Gonzales- Comelec IT personnel

The group said these people are facing several criminal and administrative complaints filed before the Office of the Ombudsman, Manila Prosecutor's Office. They are also under investigation by the Comelec.

Tarrant County hires second elections administrator of the year

BY ANNA M. TINSLEY

UPDATED FEBRUARY 02, 2018 1:35 PM

In this short video, find out who can register to vote, where to register, which documents are needed and when you must register by to vote in the next election. BY LENA BLIETZ

Only have a minute? Listen instead

Powered by Trinity Audio

00:00

02:37

For the second time this year, Tarrant County will have a new elections administrator.

Heider Garcia, elections manager in Placer County, Calif., has been hired to guide and oversee local elections.

He should join the county in mid-February to observe the March 6 primary election and help out as needed, Tarrant County Judge **Glen Whitley** said.

“We think he will be a good fit,” Whitley said.

Garcia will be sworn in as elections administrator after the primary.

The delay is to give him time to become a registered voter in Tarrant County, which Whitley said he must do before he can be sworn in.

He replaces **Nathan Neblett**, a Houston man who held the post for two weeks in January before county officials decided to “release” him from the post.

“We just decided it wasn’t going to be a good fit for us,” Whitley [said at the time](#). “We decided to go in a different direction.”

New voting machines in Tarrant County

September 3, 2019

Tarrant County voters will be casting ballots on new machines for this year's Nov. 5 constitutional amendment election. County Commissioners recently signed off on an \$11 million plan to buy this new equipment, part of Austin-based Hart InterCivic's Verity line.

These machines, approved for use by the Texas Secretary of State's office, include a paper trail.

Voters will use a touchscreen to review the ballot and make their choices. The machine will print a list of the candidates chosen. After reviewing votes on the sheet, voters must put their paper ballot into one of the scanners to formally cast their vote and drop it into the ballot box.

Tarrant County Elections Administrator Heider Garcia has asked the state to allow countywide vote centers – which would let voters cast ballots at any polling place in the county on Election Day – as soon as the November election.

TARRANT COUNTY ELECTIONS ADMINISTRATION

April 16, 2023

The Honorable Tim O' Hare
County Judge
100 East Weatherford St.
Fort Worth, Texas 76196

The Honorable GK Maenius
Tarrant County Administrator
100 East Weatherford St.
Fort Worth, Texas 76196

Gentlemen,

Please accept this letter as my formal resignation from the position of Elections Administrator for Tarrant County. My last day with the County will be June 23, 2023. This will allow sufficient time to complete all work related to the May 6 Joint Elections, any potential runoff elections in June and a smooth handover of the operation. It will be my utmost priority to guarantee operational continuity of the department before my departure.

GK, thank you for your leadership, your support, and your guidance in my time here. You believed in me and provided me all the tools I needed to do my job. I say to you what I said to Judge Glen Whitley when we canvassed the November 2022 election: *"Thank you for your leadership, and for just letting elections officials do their job and stay out of politics. That means the world to us."* When leadership respects the team's values and shows trust, members of the team become the best version of themselves. You know this, Judge Whitley knew it, and because of that, I leave Tarrant County a better man and a better professional. Thank you, GK.

Judge O'Hare, my formula to *"administer a quality transparent election"* stands on respect and zero politics; compromising on these values is not an option for me. You made it clear in our last meeting that your formula is different, thus, my decision to leave. I wish you the best; Tarrant County deserves that you find success.

Sincerely,

Heider Garcia
Elections Administrator
Tarrant County

Troy Havard
Assistant Elections Administrator
Tarrant County

Station 1

To Save Our Republic

YOU, YES **YOU**

MUST GET INVOLVED!

©2023 Mark Cook

WE MUST IMMEDIATELY progress to:

Fully Transparent, Accurate, Verifiable,

County-Managed Nationally Cross-Referenced Voter Registration System

Paper Poll Books, HAND MARKED Ballots,

PRECINCT-BASED HAND COUNT ELECTION DAY

that is Understandable by and Accessible to

Every American Citizen
