While everyone happily gazed at the puppets...

I was more interested in what was going on above them

How did we get here?

sqlmap[®]

Automatic SQL injection and database takeover tool

; Introduction();--

sqlmap is an open source penetration testing tool that automates the process of detecting and exploiting SQL injection flaws and taking over of database servers. It comes with a powerful detection engine, many niche features for the ultimate penetration tester and a broad range of switches lasting from database fingerprinting, over data fetching from the database, to accessing the underlying file system and executing commands on the operating system via out-of-band connections.

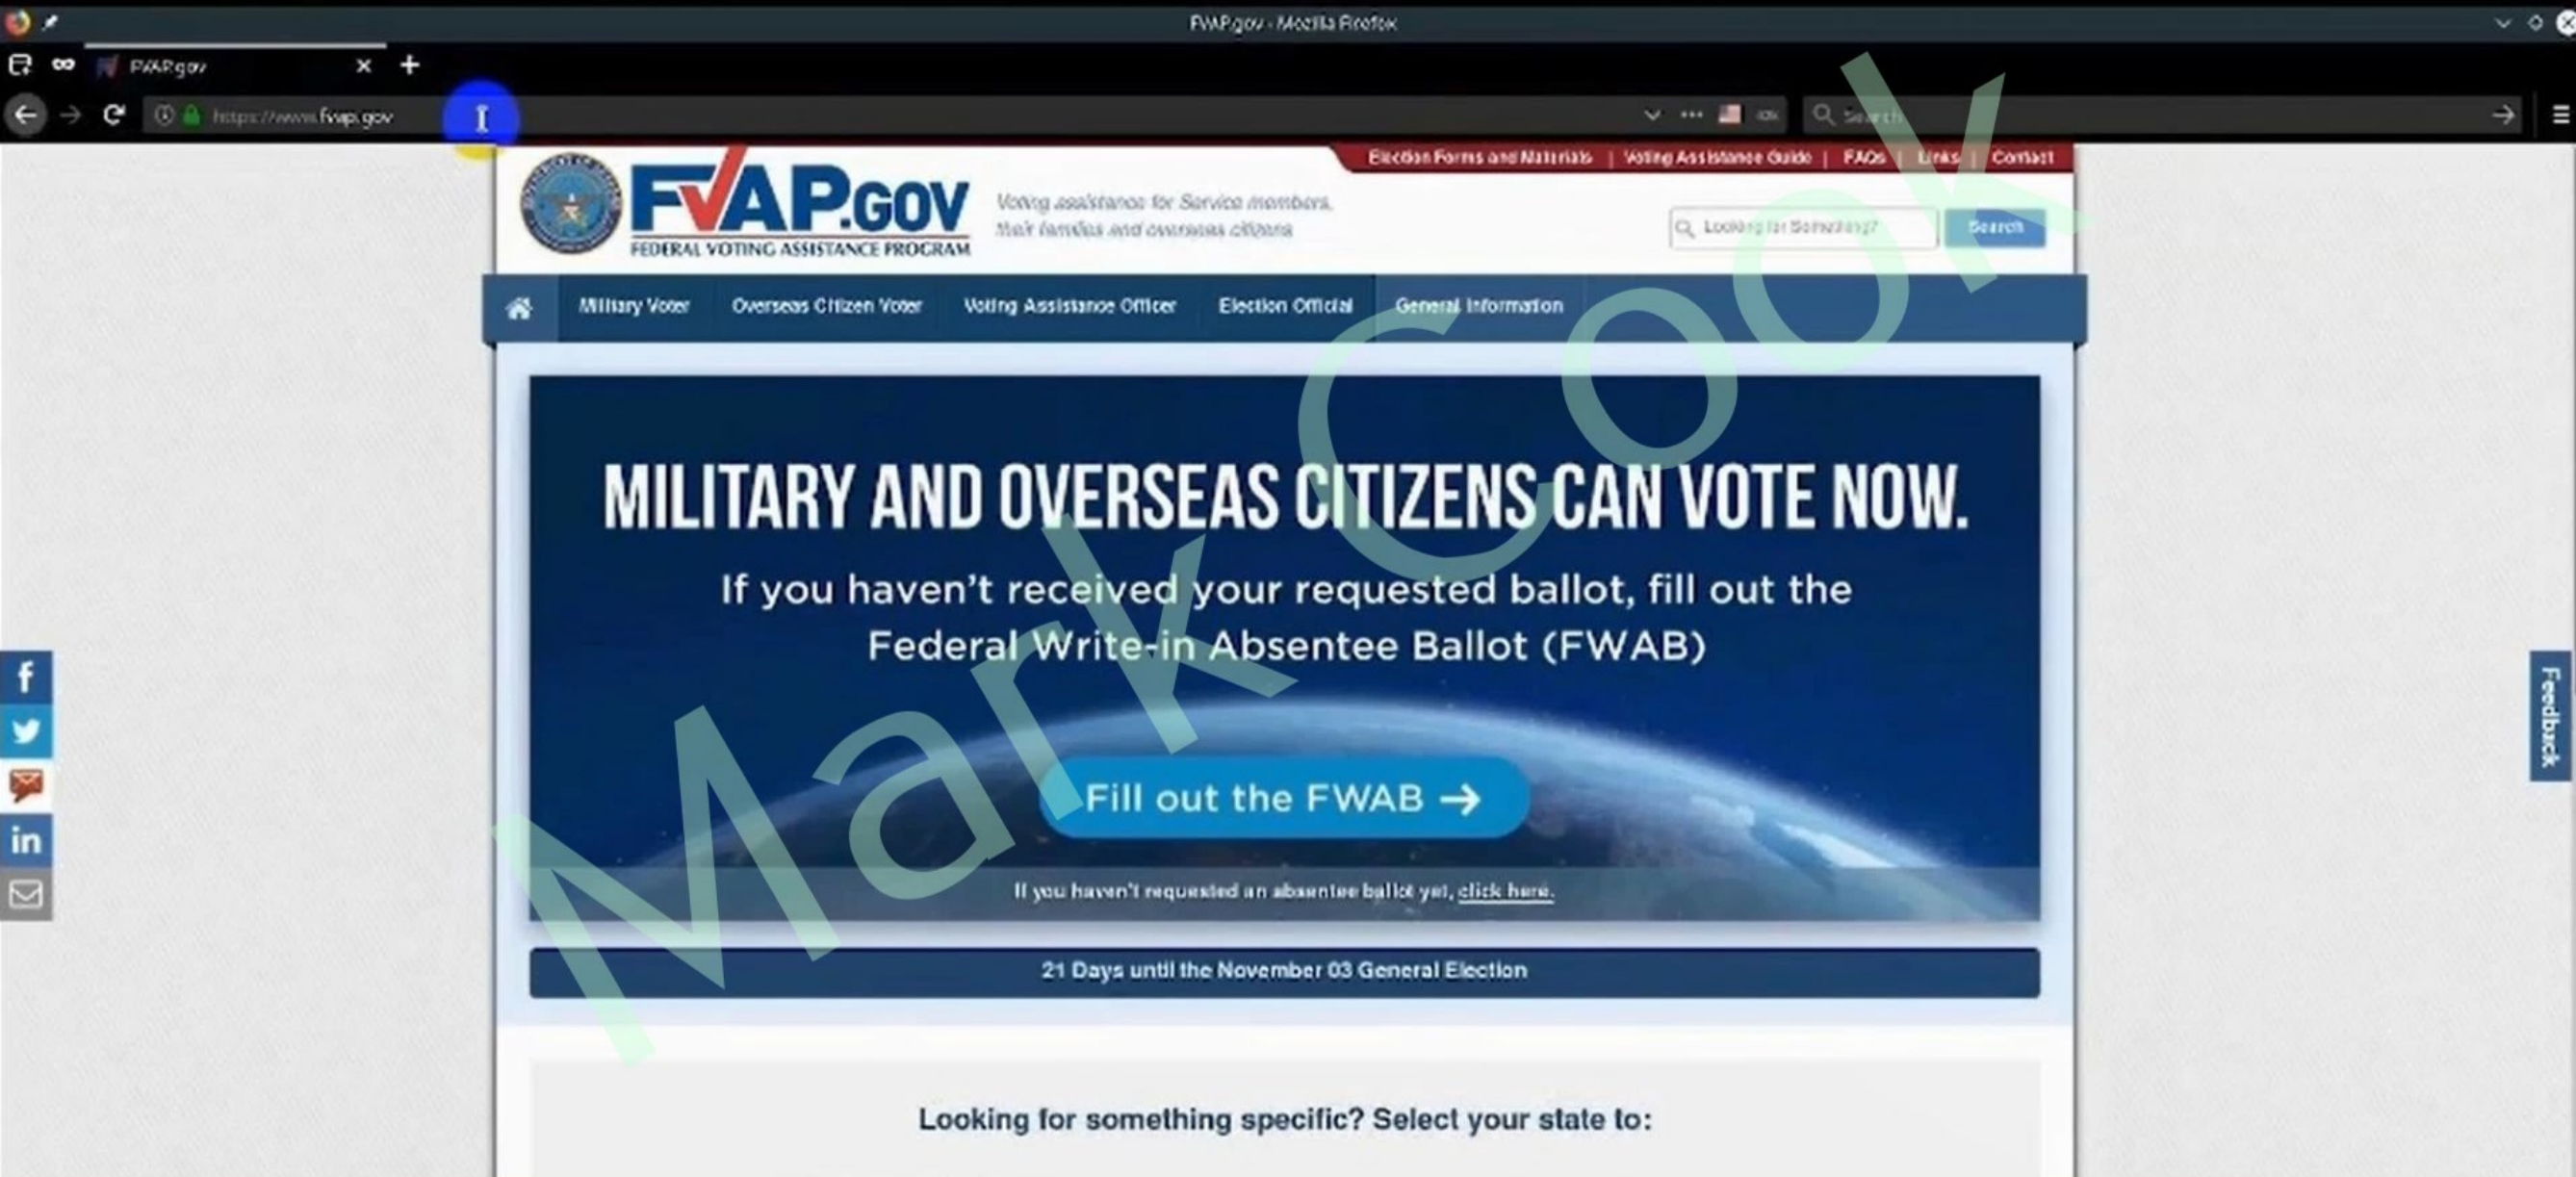

Iranian Whistleblower exploiting military ballots (Unverified)

Terminal window showing a SQL injection attack on a database. The command executed is: `mysql28:~$ sqlmap -r injection.txt --tamper=mysqlmap_3 --batch --dbt`

The terminal output shows the results of the injection, listing various fields and their values. The data is presented in a table format:

The image is a screenshot of a web browser displaying the Federal Voting Assistance Program (FVAP) website. The browser's address bar shows the URL <https://www.fvap.gov>. The website header includes the FVAP logo and the text "FVAP.GOV FEDERAL VOTING ASSISTANCE PROGRAM" with the tagline "Voting assistance for Service members, their families and overseas citizens". A search bar is present with the text "Looking for something?" and a "Search" button. A navigation menu contains links for "Military Voter", "Overseas Citizen Voter", "Voting Assistance Officer", "Election Official", and "General Information". The main content area features a large blue banner with the text "MILITARY AND OVERSEAS CITIZENS CAN VOTE NOW." and "If you haven't received your requested ballot, fill out the Federal Write-in Absentee Ballot (FWAB)". A prominent blue button with a white arrow says "Fill out the FWAB →". Below this, a smaller link reads "If you haven't requested an absentee ballot yet, [click here.](#)". At the bottom of the banner, it states "21 Days until the November 03 General Election". Below the banner, the text "Looking for something specific? Select your state to:" is visible. The browser interface includes social media icons (Facebook, Twitter, LinkedIn) on the left and a "Feedback" button on the right. A large, semi-transparent watermark "Mark" is overlaid across the center of the page.

Collin County, TX – Voter list inconsistencies

The first issue is that months after an election, voters are removed from the State List. The example below comes from the State List of Voters for Collin County for the March 1, 2022 Primary Election. Notice that from May 29 to May 30 a couple from Plano was removed from the State list of voters. We checked with the County and they have confirmed that they in fact did vote. So what is happening in the State records for this couple to be removed months after the election?

The names have been blurred for privacy. But can be shared with legislators.

left column was 03 May - 2 months after the primary

right side is June 10th

this is a list of voters who voted.

The state has 2 instances of [redacted] and [redacted] in 2 different precincts - this is possible given name statistics, especially since their VUID are different - but it's the 4 names added that is a problem.

But why were these names:

[redacted]

added to the list of voters sometime between may and june?

if they really voted why were they not there 10 days after the election

if they did not vote why were they added?

Figure 2 comparing 5/3 to 6/10 for the March Primary – 2 duplicates but that might be OK, as it may be possible with suffixes, but there were also 4 names added over 2 months after the election.

Here is a chart from Galveston County. This chart was downloaded from the SOS website on July 2, 2022, and July 24, 2022 (four months after the primary). Notice that there are 2 votes removed from the Official Election Day Voting Information.

The election numbers should be a fixed set of names and VUIDs **at the time of certification**. Why are numbers and names changing months after the election? And who is doing this? Is there something in the system that makes these changes?

These data changes do not appear to be happening at the county level. So what is happening at the State level? The SOS website has a disclaimer that says that they do not alter or modify data provided by the county.

Disclaimer: All information displayed is provided by county election officials. The Office of the Secretary of State does not alter or modify the data provided in any way. For questions related to this information, please contact the appropriate [county election official](#)

According to the above disclaimer, the State doesn't alter any information; therefore, there should NOT be changes at the State level that are not happening at the County level.

Brazos County, TX – Unusual increase in registered voters

Brazos County grows to more than 120,000 registered voters, deadline for voter registration Monday

The deadline is coming up fast to vote for the November Election

By Clay Falls

Published: Oct. 2, 2020 at 7:01 PM CDT

BRYAN, Texas (KBTX) - If you want to vote in the November election and haven't registered yet you're running out of time.

The deadline is Monday, October 5.

Brazos County now has a new record of more than 120,000 registered voters. Elections Administrator Trudy Hancock said Friday they've seen thousands of new voters added in recent weeks. The deadline to register is Monday and you'll need to know your driver's license number or the last four digits of your social security number. You don't have to present an ID to register.

"Every year we see people show up to the polls wanting to cast a ballot and they can't because they haven't registered and that's why it's very important to register before Monday," said David Hilburn, Chair of the Republican Party of Brazos County. He said their office is getting lots of calls.

"It's been a big uptick of people registering and whether that's just because of the presidential year or whether it's because of this specific election I don't know. You know as our population grows, it's natural to get people to move in. The numbers are going to go up," Hilburn added.

NBC News asked the two other major manufacturers how many of their tabulators with modems were currently in use. Hart said that it has approximately 1,600 such tabulators in use in 11 counties in Michigan. Dominion did not respond to numerous requests from NBC News for their sales numbers.

'Vulnerable to hacking'

With the 2020 presidential election only ten months away, Appel and Skoglund believe all modems can and should be removed from election systems.

"Modems in voting machines are a bad idea," said Appel. "Those modems that ES&S [and other manufacturers] are putting in their voting machines are network connections, and that leaves them vulnerable to hacking by anybody who can connect to that network."

DECEMBER 15, 2021

The Key Objectives for this report were answered by this examination:

1. To determine whether D-Suite-implemented security requirements comply with the 2002 Voting System Standards (VSS)
 - a. Uncertified software was used on the system rendering the certification of the entire system and all elections conducted with it, Invalid.
 - b. Security protections required by law were almost completely absent
 - i. Other than a userID and an easily guessed or bypassed password, no authentication was required
 - ii. The firewall rule for access to the election database, ballots and results was unrestricted to any IP address in the world
 - iii. Together with the firewall rule, Microsoft SQL Server Management Studio (SSMS) enabled complete access to the entire election databases – not just to the 2020 election but to the elections of June 2019 through May 25, 2021.
 - iv. A self-signed encryption certificate was used introducing the potential for a man-in-the-middle attack
 - v. Thirty-five wireless devices (802.11, Wi-Fi) were installed inside election equipment and an additional wireless device was identified in a connected printer
 - vi. Any or all of these wireless devices could have connected to the Internet via the building wireless facilities
 - vii. “Purging” (deletion) of critical Audit Log data, as specified by DVS and directed by the Secretary of State⁷⁵, destroyed all records of connection to the Internet or elsewhere, all record of user activity, including programs run by these users, errors, and any record of the addition or deletion of votes and the alteration of election results.
 - c. **EACH of the compliance failures identified in 1.a. and 1.b. above are clear violations of the law.**

Conclusions

While the 4.14.A.1 build of the Democracy Voting System proved to mitigate four previously enumerated vulnerabilities, multiple medium and high vulnerabilities still exist within the suite of systems. A remote user could leverage most of the vulnerabilities across the network to obtain information about the system, voter ballots and results, or gain remote access to the system.

If remote access is gained, recovery of user credentials through system memory (RAM) analysis could be executed and used to modify the backend database of the EMS Server.

County Completion Report

The majority of counties in Utah now vote by mail. Because any batch of ballots could include voters from multiple precincts, it is no longer helpful to track the number of precincts reporting to know when all votes have been counted.

This page will indicate when each county has completed counting ballots on election night and each subsequent day when ballots are counted and results are released. For additional information on results displayed on this website please [click here](#).

Group asks BI: Stop Smartmatic, Comelec people from leaving PHL

By VIRGIL LOPEZ, GMA News

Published June 4, 2016 3:49pm

A poll watchdog group has asked the Bureau of Immigration (BI) to prevent 10 people from leaving the country for their alleged role in the controversial script change in the Comelec transparency server that receives precinct-level votes.

In a letter dated June 2, election watchdog "Mata sa Balota" urged BI Commissioner Ronaldo Geron to issue a hold departure order (HDO) against the following personalities:

advertisement

- Cesar Flores -Smartmatic-TIM president for Southeast Asia
- Heider Garcia- Smartmatic official
- Marlon Garcia - Smartmatic Philippines project manager
- Elie Moreno - Smartmatic project director
- Neil Banigued- Smartmatic technical support member
- Mauricio Herrera - Smartmatic technical support member
- Andres Kapunan- Smartmatic Mindanao
- Rouie Peñalba- Comelec IT personnel
- Nelson Herrera - Comelec IT personnel
- Frances Mae Gonzales- Comelec IT personnel

The group said these people are facing several criminal and administrative complaints filed before the Office of the Ombudsman, Manila Prosecutor's Office. They are also under investigation by the Comelec.

Tarrant County hires second elections administrator of the year

For the second time this year, Tarrant County will have a new elections administrator.

Heider Garcia, elections manager in Placer County, Calif., has been hired to guide and oversee local elections.

He should join the county in mid-February to observe the March 6 primary election and help out as needed, Tarrant County Judge **Glen Whitley** said.

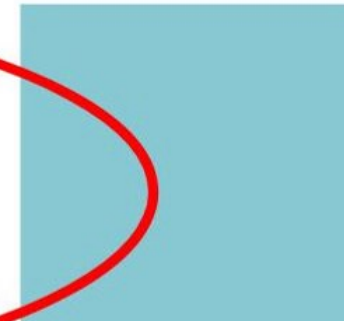

“We think he will be a good fit,” Whitley said.

Garcia will be sworn in as elections administrator after the primary.

The delay is to give him time to become a registered voter in Tarrant County, which Whitley said he must do before he can be sworn in.

He replaces **Nathan Neblett**, a Houston man who held the post for two weeks in January before county officials decided to “release” him from the post.

“We just decided it wasn’t going to be a good fit for us,” Whitley [said at the time](#). “We decided to go in a different direction.”

New voting machines in Tarrant County

September 3, 2019

Tarrant County voters will be casting ballots on new machines for this year's Nov. 5 constitutional amendment election. County Commissioners recently signed off on an \$11 million plan to buy this new equipment, part of Austin-based Hart InterCivic's Verity line.

These machines, approved for use by the Texas Secretary of State's office, include a paper trail.

Voters will use a touchscreen to review the ballot and make their choices. The machine will print a list of the candidates chosen. After reviewing votes on the sheet, voters must put their paper ballot into one of the scanners to formally cast their vote and drop it into the ballot box.

Tarrant County Elections Administrator Heider Garcia has asked the state to allow countywide vote centers — which would let voters cast ballots at any polling place in the county on Election Day — as soon as the November election.

Tarrant GOP Denies County Turned Blue, Makes Trumpian Claims of Irregularities

LAUREN DREWES DANIELS | DECEMBER 1, 2020 | 4:00AM

The Tarrant County GOP is quite agitated the county has been cast as “blue” after the Nov. 3 general election. As mail-in ballots trickled in after Election Day, the seesaw tipped ever so slightly Democratic under the weight of about 1,826 more votes cast for the Biden/Harris ticket than Trump/Pence. It’s not much, but this isn’t horseshoes.

The county hadn’t voted for a Democrat for president since 1964.

The Honorable GK Maenius
Tarrant County Administrator
100 East Weatherford St.
Fort Worth, Texas 76196

Gentlemen,

Please accept this letter as my formal resignation from the position of Elections Administrator for Tarrant County. My last day with the County will be June 23, 2023. This will allow sufficient time to complete all work related to the May 6 Joint Elections, any potential runoff elections in June and a smooth handover of the operation. It will be my utmost priority to guarantee operational continuity of the department before my departure.

GK, thank you for your leadership, your support, and your guidance in my time here. You believed in me and provided me all the tools I needed to do my job. I say to you what I said to Judge Glen Whitley when we canvassed the November 2022 election: *"Thank you for your leadership, and for just letting elections officials do their job and stay out of politics. That means the world to us."* When leadership respects the team's values and shows trust, members of the team become the best version of themselves. You know this, Judge Whitley knew it, and because of that, I leave Tarrant County a better man and a better professional. Thank you, GK.

Judge O'Hare, my formula to *"administer a quality transparent election"* stands on respect and zero politics; compromising on these values is not an option for me. You made it clear in our last meeting that your formula is different, thus, my decision to leave. I wish you the best; Tarrant County deserves that you find success.

Sincerely,

Heider Garcia
