Whole Foods CEOs Admit to Overcharging Customers: 'We Made Some Mistakes'

On Wednesday, Whole Foods released a video starring its CEOs—Walter Robb and John Mackey—to respond to backlash facing the company, following a lengthy investigation that found Whole Foods guilty of routinely overcharging customers.

By **Staff Author** | Updated on December 3, 2020 01:55PM EST

Whole Foods has just released a video starring its CEOs—Walter Robb and John Mackey—to respond to backlash facing the company, following a lengthy investigation that accused Whole Foods of routinely overcharging customers.

"Straight up, we made some mistakes," began Robb, who stood by Mackey in the video released Wednesday.

In June, the Department of Consumer Affairs stated that the supermarket chain, which boasts a total of 422 stores in the United States, had been overcharging customers due to an overstated weight/price ratio when it came to certain items, including vegetables, fruit and prepackaged meat.

Although recent reports took aim at New York City locations, pricing errors were also uncovered in a California-based Whole Foods, resulting in a handful of penalties.

Iranian Whistleblower exploiting military ballots (Unverified)

Mark Cook

'; Introduction();--

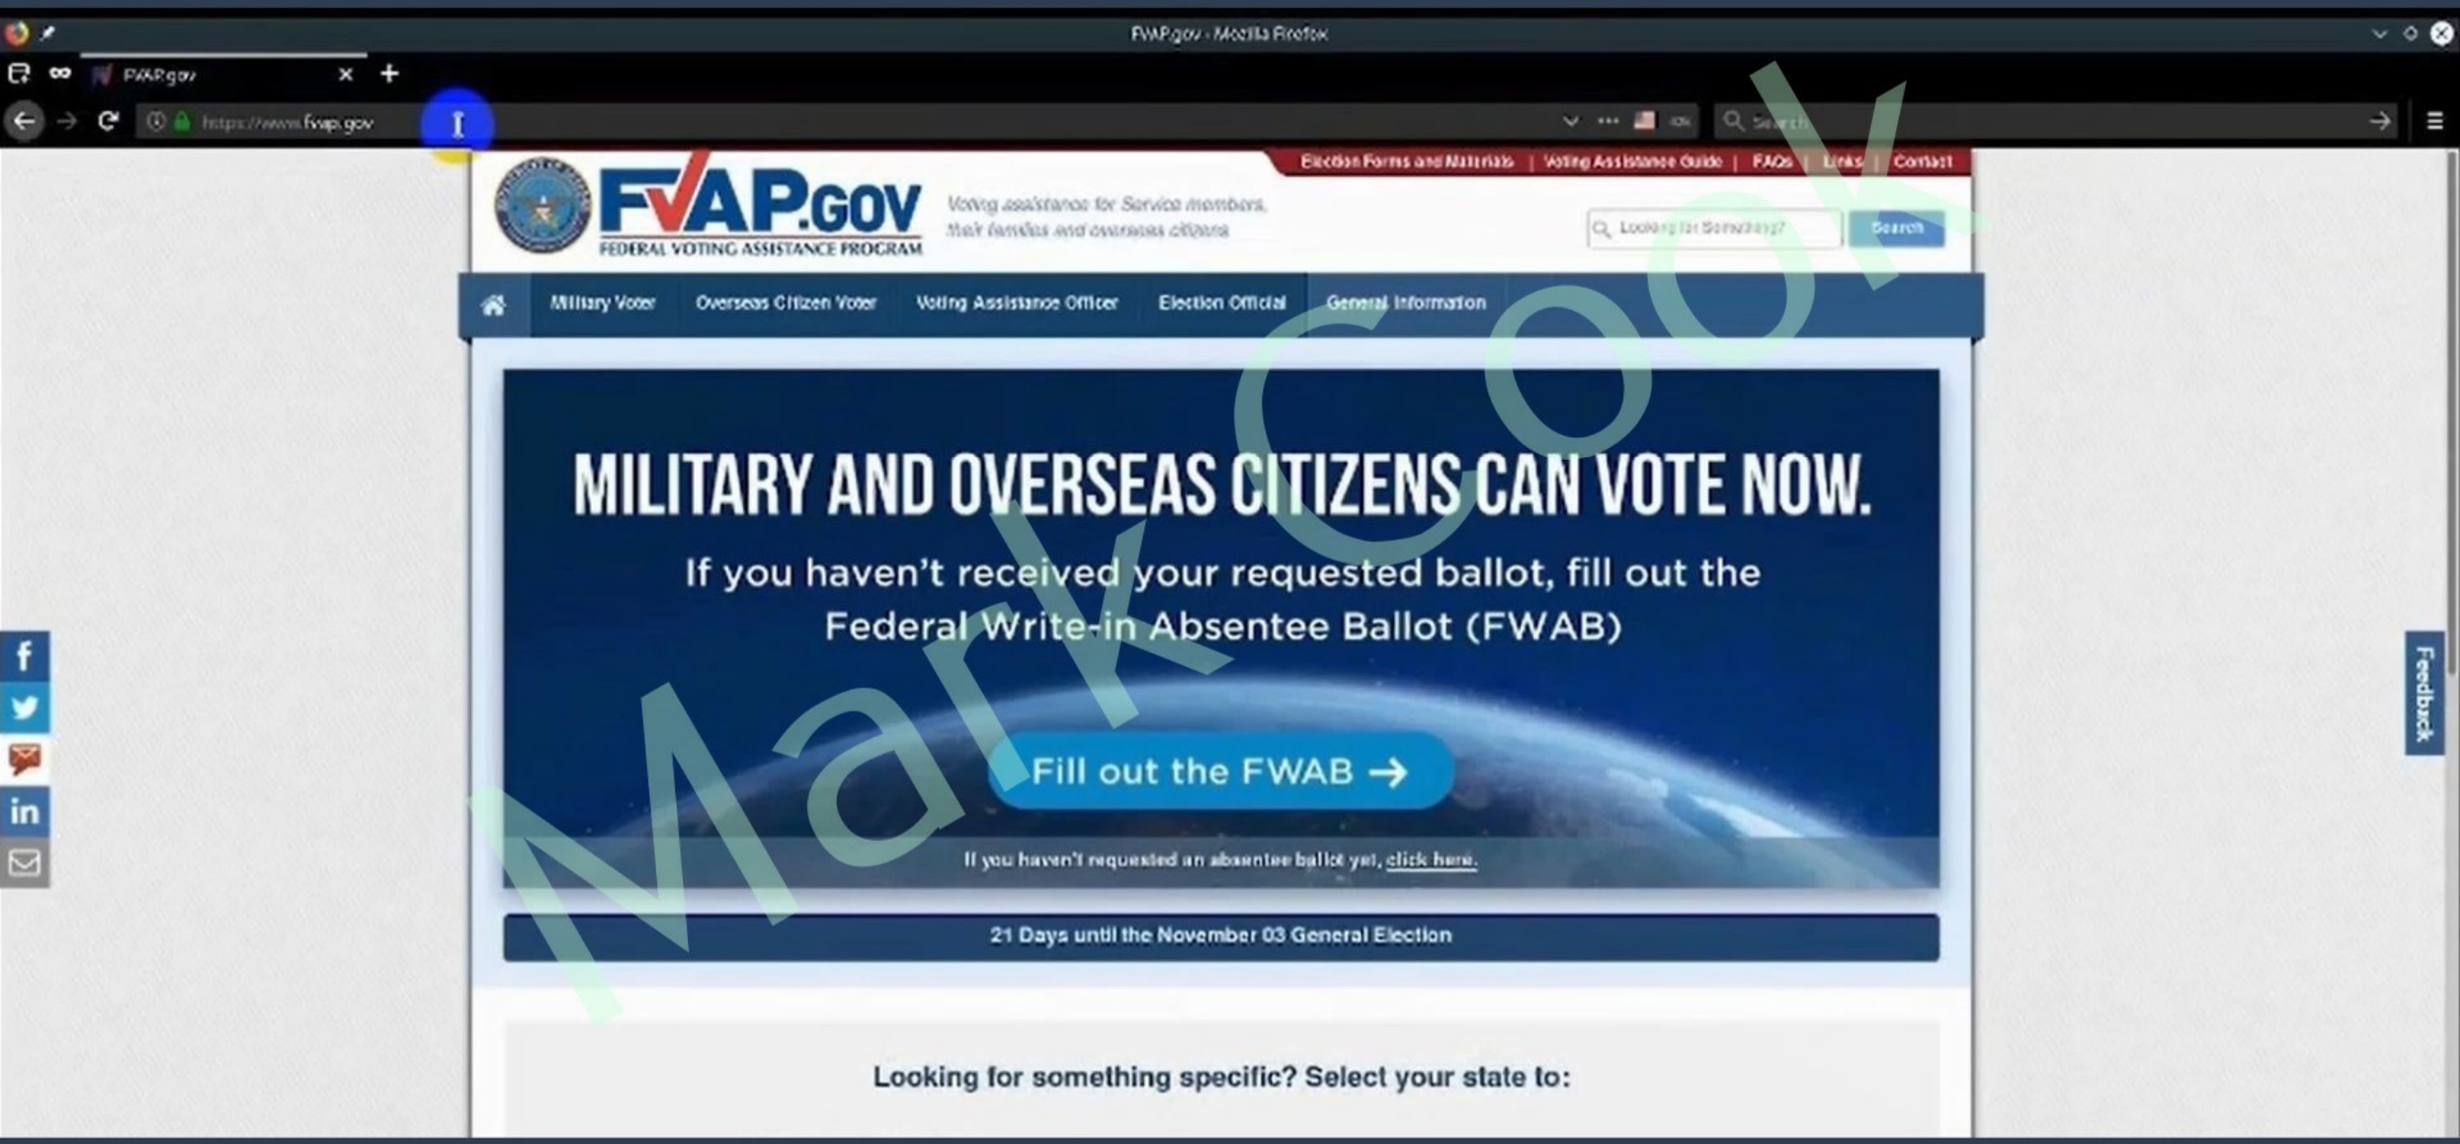

sqlmap is an open source penetration testing tool that automates the process of detecting and exploiting SQL injection flaws and taking over of database servers. It comes with a powerful detection engine, many niche features for the ultimate penetration tester and a broad range of switches lasting from database fingerprinting, over data fetching from the database, to accessing the underlying file system and executing commands on the operating system via out-of-band connections.

Collin County, TX – Voter list inconsistencies

The first issue is that months after an election, voters are removed from the State List. The example below comes from the State List of Voters for Collin County for the March 1, 2022 Primary Election. Notice that from May 29 to May 30 a couple from Plano was removed from the State list of voters. We checked with the County and they have confirmed that they in fact did vote. So what is happening in the State records for this couple to be removed months after the election?

The names have been blurred for privacy. But can be shared with legislators.

Figure 1. Two people removed from the State Roster for March Primary – Removed sometime between 5/29 and 5/30

© 2023 LostVotes.us. All Rights Reserved.

Collin County, TX – Voter list inconsistencies

Here is another example from Collin County where the State added four voters sometime between May 3, 2022 and June 10, 2022. Where did these names come from?

The names have been redacted for privacy. But can be shared with legislators.

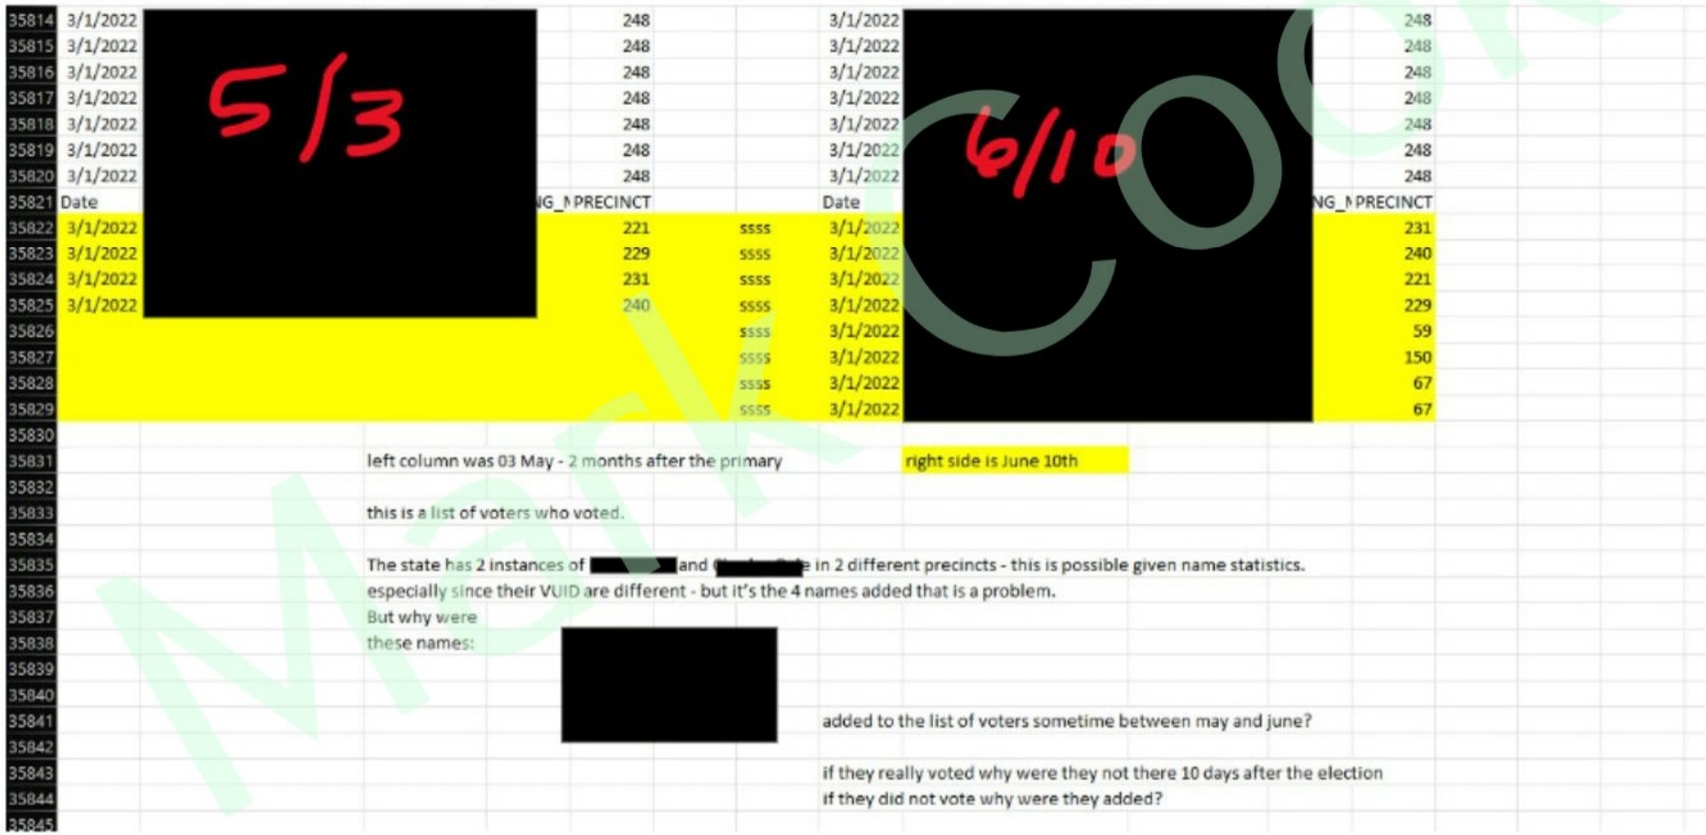

Figure 2 comparing 5/3 to 6/10 for the March Primary – 2 duplicates but that might be OK, as it may be possible with suffixes, but there were also 4 names added over 2 months after the election.

Galveston County, TX – Voter list inconsistencies

And this issue does not just occur in Collin County.

Here is a chart from Galveston County. This chart was downloaded from the SOS website on July 2, 2022, and July 24, 2022 (four months after the primary). Notice that there are 2 votes removed from the Official Election Day Voting Information.

Figure 3 – This is 4 months after the election. 2 votes were removed from the OFFICIAL Election Day Voting Information.

The election numbers should be a fixed set of names and VUIDs **at the time of certification**. Why are numbers and names changing months after the election? And who is doing this? Is there something in the system that makes these changes?

These data changes do not appear to be happening at the county level. So what is happening at the State level? The SOS website has a disclaimer that says that they do not alter or modify data provided by the county.

> **Disclaimer:** All information displayed is provided by county election officials. The Office of the Secretary of State does not alter or modify the data provided in any way. For questions related to this information, please contact the appropriate county election official

According to the above disclaimer, the State doesn't alter any information; therefore, there should NOT be changes at the State level that are not happening at the County level.

Brazos County, TX – Unusual increase in registered voters

Brazos County grows to more than 120,000 registered voters, deadline for voter registration Monday

The deadline is coming up fast to vote for the November Election

By Clay Falls

Published: Oct. 2, 2020 at 7:01 PM CDT

BRYAN, Texas (KBTX) - If you want to vote in the November election and haven't registered yet you're running out of time.

The deadline is Monday, October 5.

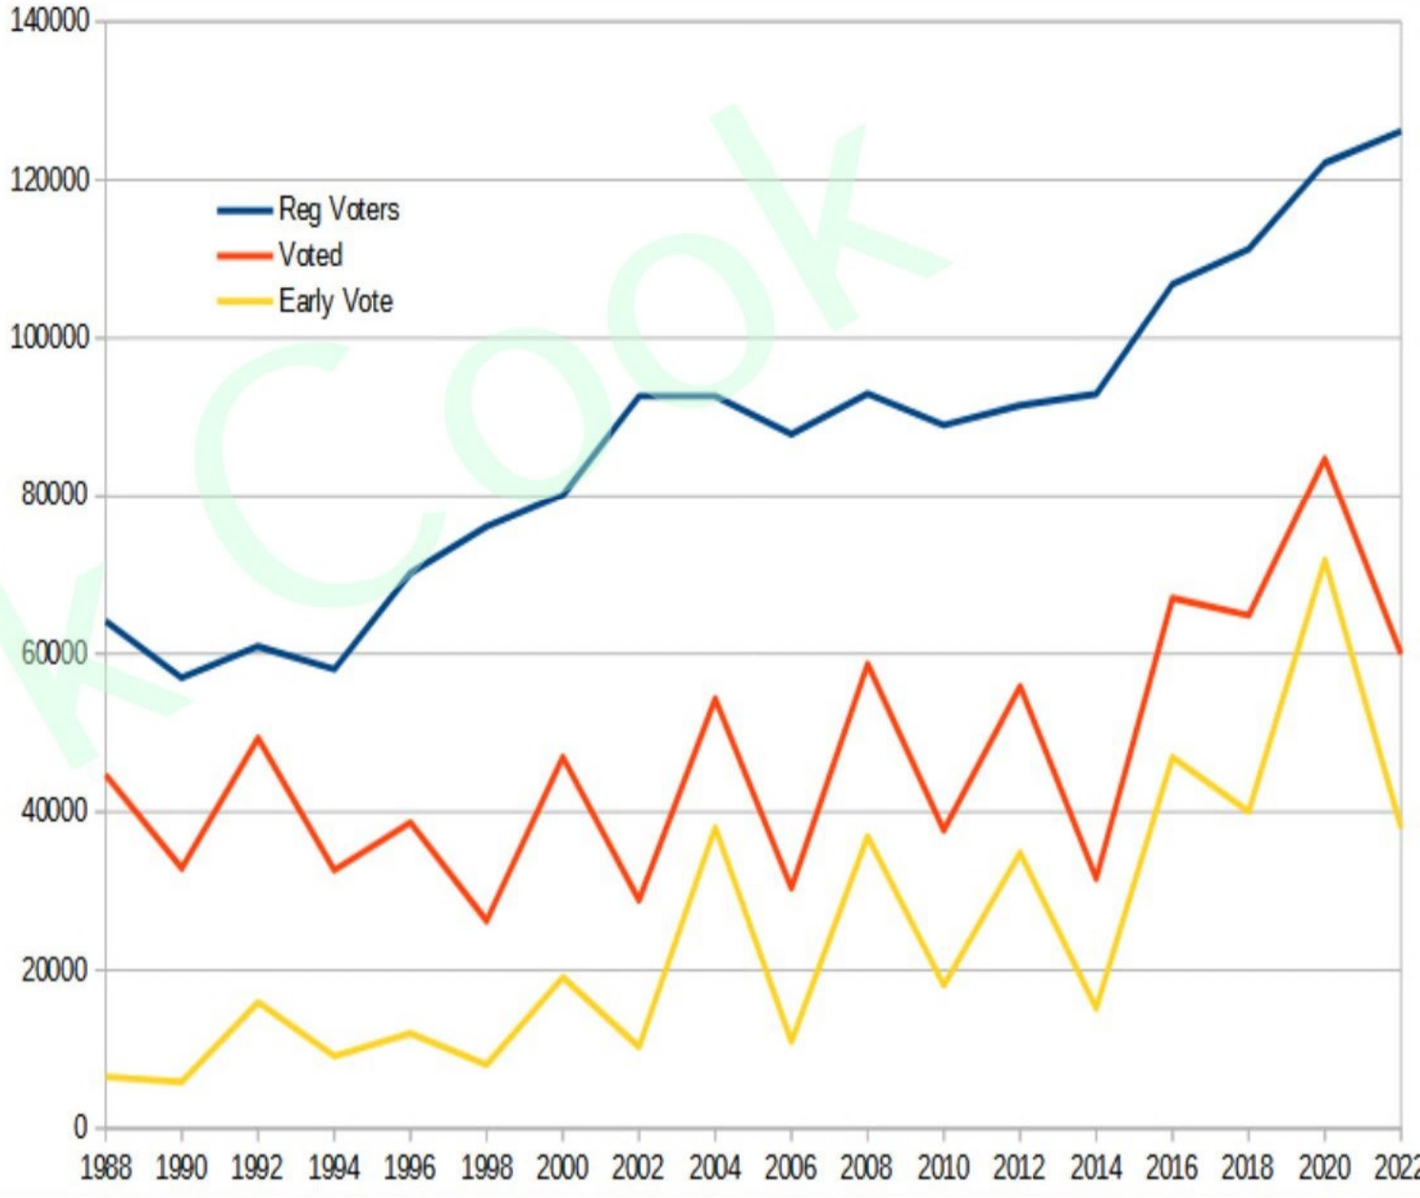

Brazos County now has a new record of more than 120,000 registered voters. Elections Administrator Trudy Hancock said Friday they've seen thousands of new voters added in recent weeks. The deadline to register is Monday and you'll need to know your driver's license number or the last four digits of your social security number. You don't have to present an ID to register.

"Every year we see people show up to the polls wanting to cast a ballot and they can't because they haven't registered and that's why it's very important to register before Monday," said David Hilburn, Chair of the Republican Party of Brazos County.
He said their office is getting lots of calls.

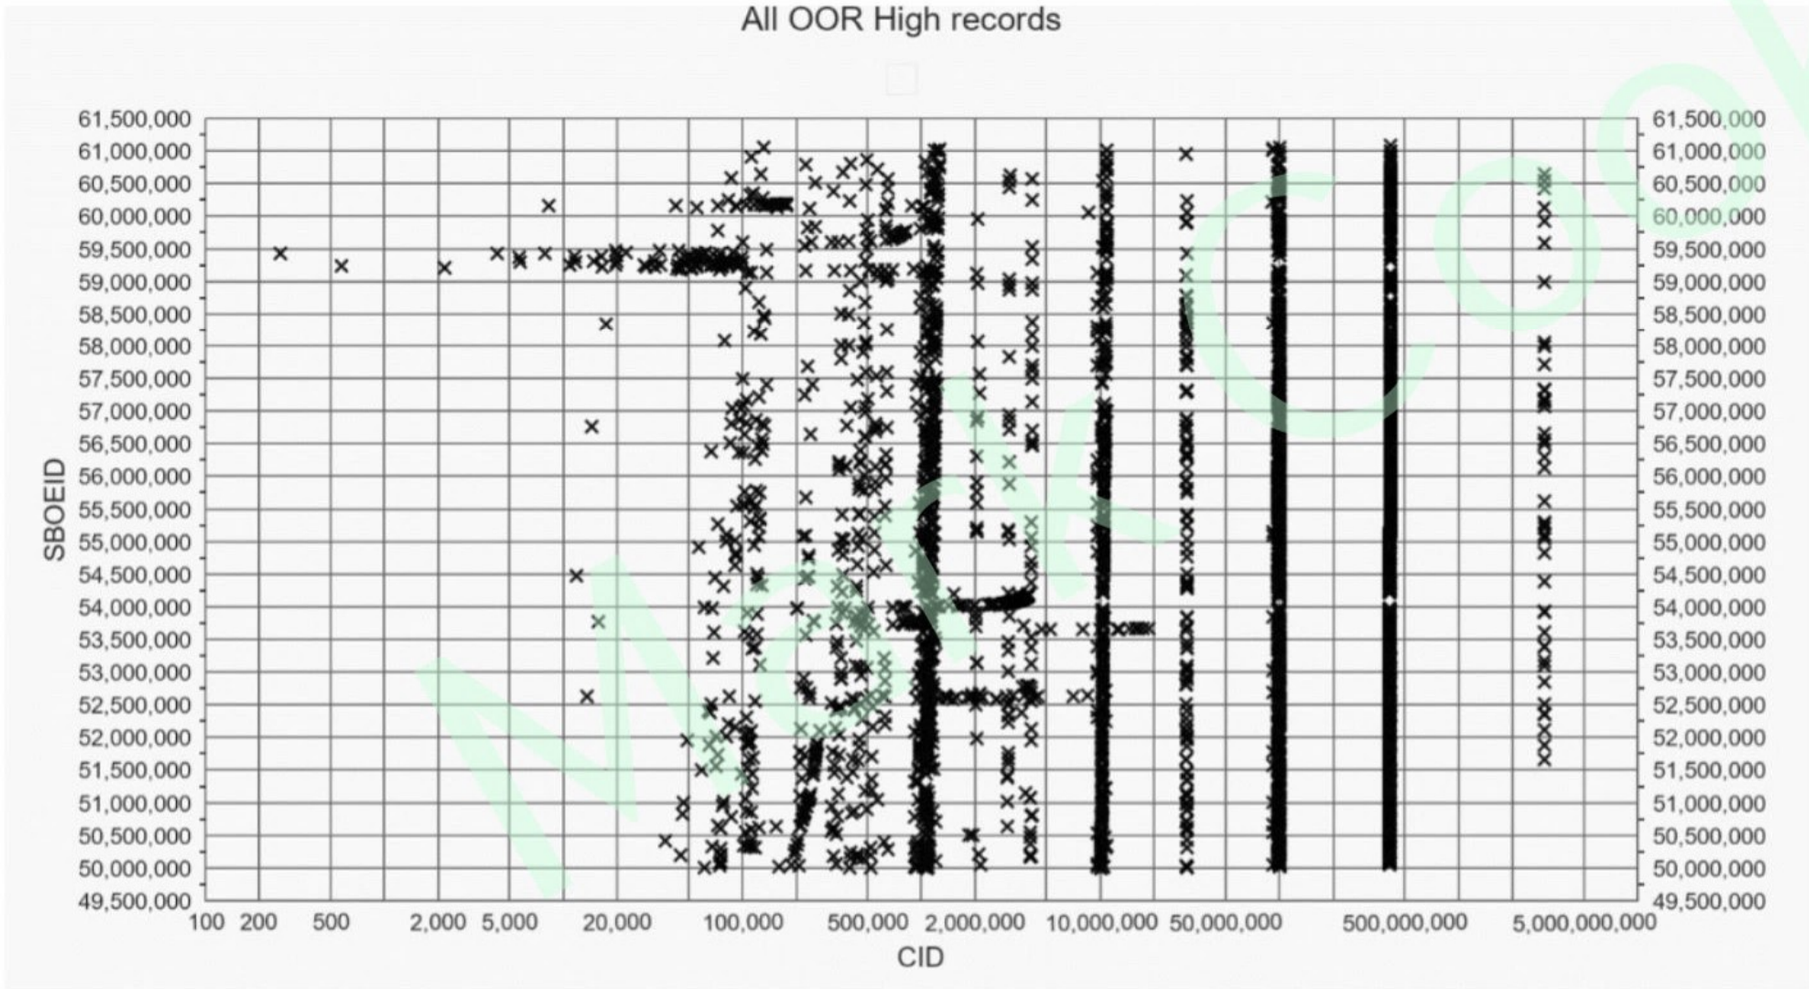

"It's been a big uptick of people registering and whether that's just because of the presidential year or whether it's because of this specific election I don't know. You know as our population grows, it's natural to get people to move in. The numbers are going to go up," Hilburn added.

Brazos County, TX – Unusual Patterns

YEAR	Reg Voters	Voted	Voted %	Early Vote	EV %
1988	64,143	44,690	69.67%	6,536	14.63%
1990	56,949	32,886	57.75%	5,888	17.90%
1992	60,915	49,334	80.99%	15,931	32.29%
1994	58,036	32,641	56.24%	9,118	27.93%
1996	70,204	38,644	55.05%	12,003	31.06%

Arizona AG report finds no evidence of mass fraud in Maricopa County 2020 election results

But Attorney General Mark Brnovich said his office did find "serious vulnerabilities" with signature verification processes and transportation of ballots from drop box locations.

Although Wednesday's report did not find mass fraud or conspiracy in the 2020 election, it outlined his office's concerns with "serious vulnerabilities" involving certain procedures during the campaign, including the signature verification process and the transportation of ballots from drop box locations.

VICTOR JOECKS: County lowers 'confidence level' for ballot signatures

A mail-in ballot for the primary election. (Hali Bernstein Saylor/Boulder City Review)

By Victor Joecks Las Vegas Review-Journal

October 20, 2020 - 9:00 pm

Don't miss the big stories. Like us on Facebook.

The Clark County Election Department lowered the factory settings on its signature verification machine. So much for matching signatures as an impenetrable guard against election fraud.

That score is a "confidence level," said Anthony Paiz, vice president of field services of Runbeck Election Services, which makes the machine. Paiz said his company recommends changes to that score are "done with bipartisan" buy-in.

That didn't happen in Clark County, where officials downgraded the confidence level to a 40 out of 100.

"To determine what score to use, we ran tests of the system and concluded that 40 would accept all the signatures that are obvious matches," the spokesman said.

When asked if the "40" confidence level allowed inaccurate ballots to get through, the spokesman didn't respond by deadline. Registrar Joe Gloria

refused to answer questions on Monday.

This is terrifying. Clark County is potentially the swing county in the swing state. It has tens of thousands of ballots floating around, legalized ballot harvesting and downgraded signature verification.

Did Clark County, Nevada use a defective signature-matching computer system in the 2020 election?

NO

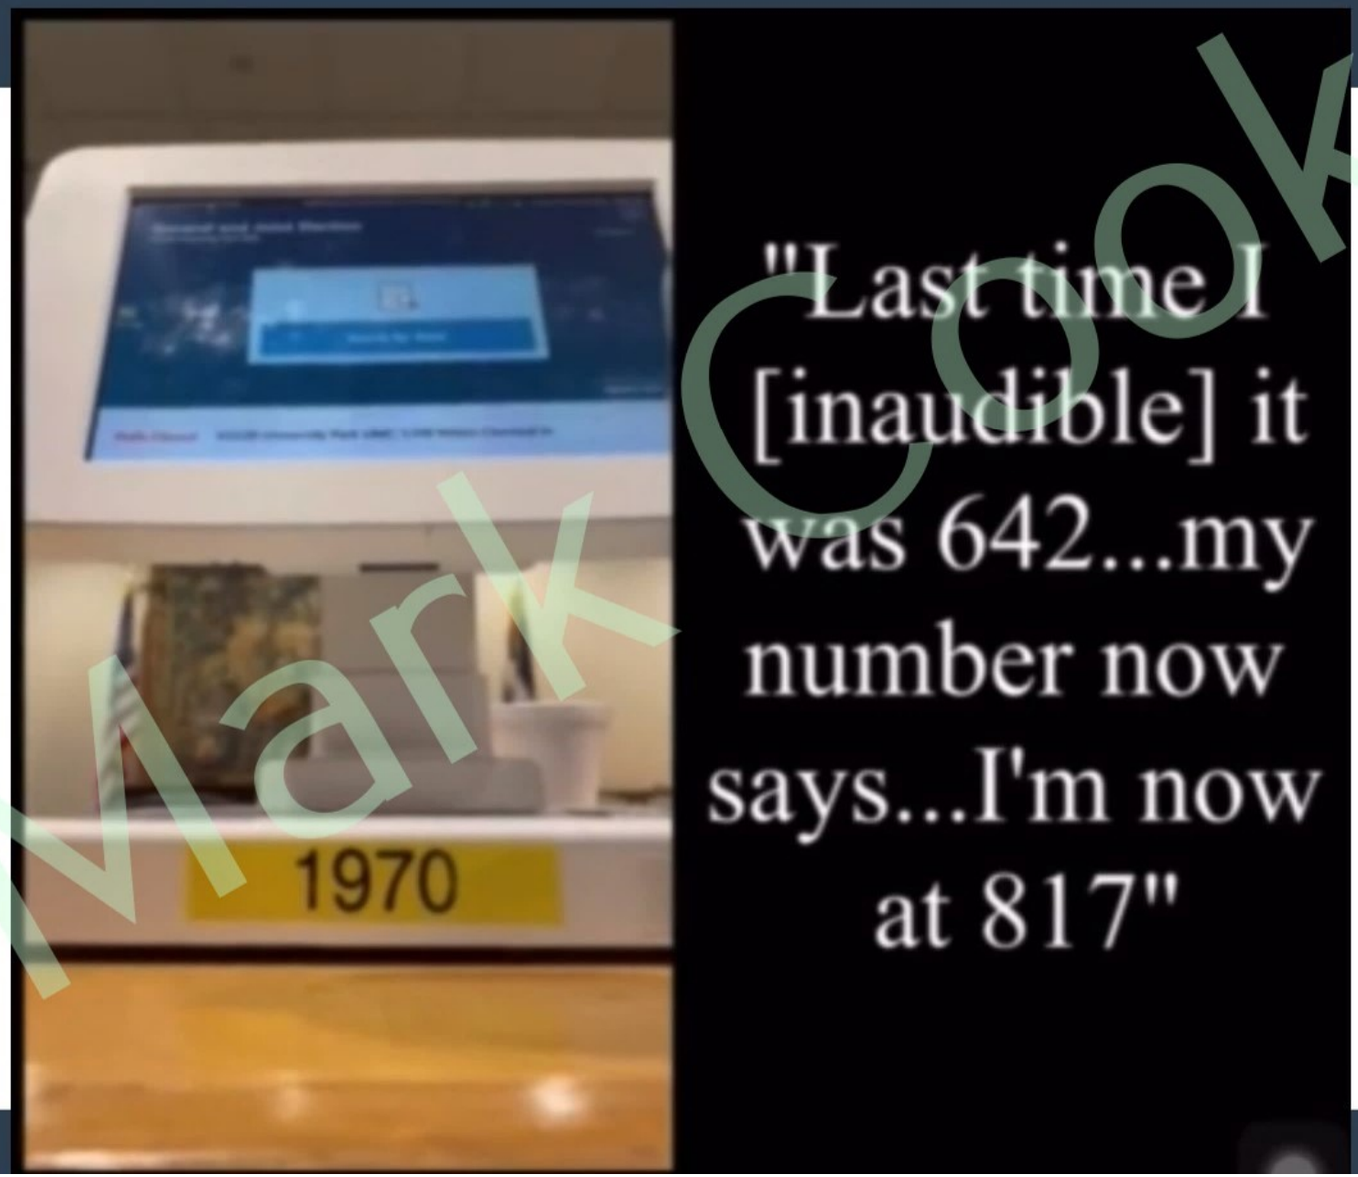

In 2020, Clark County used a two-step process to verify voter signatures on mail-in ballots. The Agilis computerized scanning system reviewed signatures, accepting about 30%; additional human verification was used for the remaining 70%.

Republicans filed lawsuits challenging the county's signature verification process, which ultimately failed in both state and federal court.

A central claim of the lawsuits was that the Agilis system had a lower sensitivity setting than desired and should have accepted even fewer than 30% of signatures. Election officials testified that Agilis tested well at the setting used and that the county's ballot rejection rate was in line with the statewide signature rejection rate.

"The machine used in Clark County to verify signatures is called Agilis. And earlier this year, Clark County officials announced that they would need to lower the recommended factory tolerance settings on the Agilis machine in order to capture the Nevada Department of Motor Vehicles' signature used to verify mail-in ballots. To match a ballot signature, the Agilis machine requires a clear signature on file with election officials that is scanned at a minimum resolution of 200 d.p.i. Nevertheless, the bulk of Clark County's signature files come from the Nevada DMV, which doesn't even have the capability of scanning signatures at that resolution. Knowing this, Clark County election officials still lowered the signature match threshold in order to capture blurry signatures and speed through the counting process. However, Artificial Intelligence experts and signature verification experts agree that changing the factory settings in this way will largely render the system useless."

NBC News asked the two other major manufacturers how many of their tabulators with modems were currently in use. Hart said that it has approximately 1,600 such tabulators in use in 11 counties in Michigan. Dominion did not respond to numerous requests from NBC News for their sales numbers.

'Vulnerable to hacking'

With the 2020 presidential election only ten months away, Appel and Skoglund believe all modems can and should be removed from election systems.

"Modems in voting machines are a bad idea," said Appel. "Those modems that ES&S [and other manufacturers] are putting in their voting machines are network connections, and that leaves them vulnerable to hacking by anybody who can connect to that network."

Dominion Employee in Serbia and a possible account hack

Why does Dominion (an alleged US voting system company) have a developer in SERBIA that has access to their information, and possibly source code along with election projects from various states in the US?

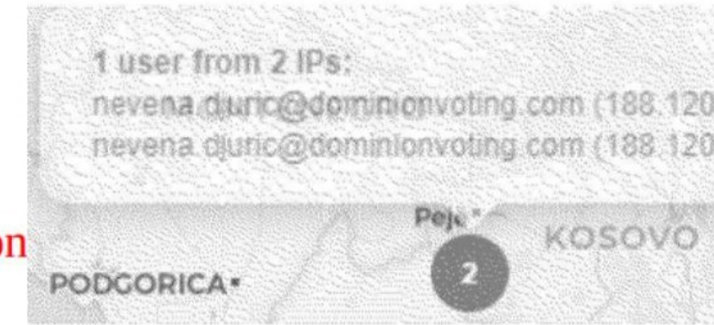

To: Jeremy Holck[jeremy.holck@dominionvoting.com]
From: Nevena Djuric
Sent: Thur 4/23/2020 8:15:12 AM
Subject: RE: Nevana Logins from Kosovo

I can confirm again that my cell phone was always only in my possession. Last night, around 10 - 11 PM (Serbia time) I was checking mail from my cell phone.
Also, I changed my password yesterday after I received these information.
Option that I can suggest is to use OKTA on my phone only when I am using home internet with the IP address **77.46.240.39**
I'm grateful for the attention and time you put into this case and if there is anything that I can do, please tell me.

Subject: RE: Nevana Logins from Kosovo

Is Jeremy so ignorant that he thinks that an IP address can 'pass its location'? If so, why would Dominion hire someone that doesn't even understand such a basic concept?

Strang, another alert just came in. For some reason, the 77.46.240.39 address is passing its location as Kosovo. The first entry below is from an Office 365 log, and it shows Telkom Srbija but a location of Kosovo. I then searched the Okta logs and for the same IP, it is showing Kosovo as well based on it Latitude and Longitude coordinates. I then checked Okta for the week prior and you had a different IP address of 77.243.31.254 and it was showing a location of Serbia.

Dominion Website found with security vulnerability Sept 30 2020

Subject: [EXTERNAL] Bug Report

Hello Security Team,
My name is Mohd Asif Khan and I am a Security Researcher.
I have found a bug in your site. Report of the bug is as follows:-

a) Summary:-
It's possible to get information about the users registered (such as: id, name, login name, etc.) without authentication in Wordpress via API on https://www.dominionvoting.com/wp-json/wp/v2/users

b) Description:-
By default Wordpress allows public access to the Rest API to get information about all users registered on the system.

c) Steps To Reproduce:-
1. Visit url:- https://www.dominionvoting.com/ and add /wp-json/wp/v2/users/
2. https://www.dominionvoting.com/wp-json/wp/v2/users
3. Add numbers like https://www.dominionvoting.com/wp-json/wp/v2/users (1,2,3,4....) to get information about the users.

Subject: RE: Visual Studio 2019 Professional (Version 16.10) subscription | license | product key

Hi all,
The usage of product key is much better than using the account name to sign in to VS 2019. That was initial idea.

There is another reason why we should use a separate account for trusted builds. If there is a limitation regarding the number of machines where the same VS 2019 license can be used to sign in to VS 2019, then I think the solution to have the new account (that will be used for trusted builds only) is a better solution (since all developers usually installed VS 2019 on their office machines, laptops etc..). In case of using that new account the product key will also be used (instead of account name

Subject: RE: RTM - Listener certificate signing

When we talk about certificates in general – Dominion is not the certificate issuer. Actually, we can create certificate, but – level of trust can be problematic... Different people (users) have different perspective what certificate means and how it should be obtained.

One more thing – when we are sending election results through Internet (from tabulators or RTM), this is not closed system any more.

Do the citizens know that election results are being sent through the internet?

At least they admit this!

Therefore, my general approach to this problem is:

- do not assume anything regarding who/how/when certificate should be created/obtained,
- do not assume anything regarding the name of the certificate
- Our system should be able to:
  - import any provided certificate (but first to check validity), or/and
  - Create certificate on simple and intuitive way. Furthermore, implement logic that the same certificate is be copied to exact location where, EMS will pick it up, when prepare definition files for tabulators/RTM...

A candidate in Georgia who appeared to get few Election Day votes was actually in first place.

The discrepancy in a race for a county-level board of commissioners seat was blamed on a series of technical errors.

Share full article

The candidate, Michelle Long Spears, was shortchanged by 3,792 votes in the District 2 primary for the Board of Commissioners in DeKalb County, Ga., that was held on May 24, according to newly-certified results released on Friday.

After conducting a hand count over the Memorial Day weekend and auditing those returns, election officials determined that they had drastically underreported the vote totals for Ms. Spears.

She received 43 percent of the vote, not 24 percent, as reported by an unofficial and incomplete election summary posted on May 25 on the county's website. As the top vote-getter, Ms. Spears qualified for a June 21 runoff against the second-place candidate, Lauren Alexander.

"I hope that this never happens to another candidate, in another race ever again," Ms. Spears said. "It has been a nightmare."

Election officials attributed the discrepancy to a series of technical and human errors, which they characterized as being isolated to the primary race.

They said that the problems, which they described as a computer programming error, began when a fourth candidate withdrew from the race late — 135 votes were cast for that former candidate. A redistricting error compounded the situation, according to the county.

CHEROKEE COUNTY

Cherokee County Clerk follows up on mixed election results

by: Jessica Schaer
Posted: Aug 9, 2022 / 06:20 PM CDT
Updated: Aug 9, 2022 / 06:20 PM CDT

CHEROKEE COUNTY, Kans. — We're learning more on the events that lead to a mix-up in a Cherokee County Commissioner race.

The Cherokee County Clerk says an audit was done this past Friday and officials noticed a discrepancy that showed the numbers were correct, they were just under the wrong candidate. Image prints on the thumb drive for "County Commissioner District One" switched the numbers for incumbent Myra Frazier, and challenger Lance Nichols. A full hand re-count was done twice to ensure the accurate results of the vote and found Myra Frazier to be the true winner of the race.

The election software company has taken full responsibility for the error. The County Clerk just wants to ensure voters their vote will always count.

"I want to be as transparent as I can possibly be to the citizens of Cherokee County. And, I don't want them to ever have to think that there's anything to worry about when it comes to elections in this office," said Rebecca Brassart, Cherokee County Clerk.

The County Clerk is now going through all of the thumb drives to make sure all the other races in the county and at the state-level are correct.

Report #1 with

Forensic Examination and Analysis

Mark C

Figure 8 - EMS Server (5.11-CO) Web Server Log Files Before

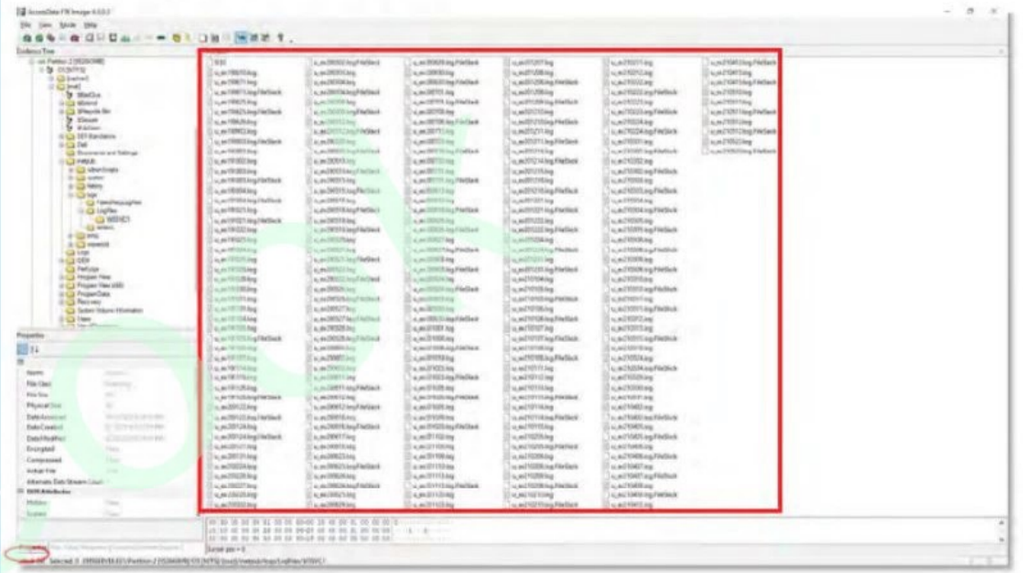

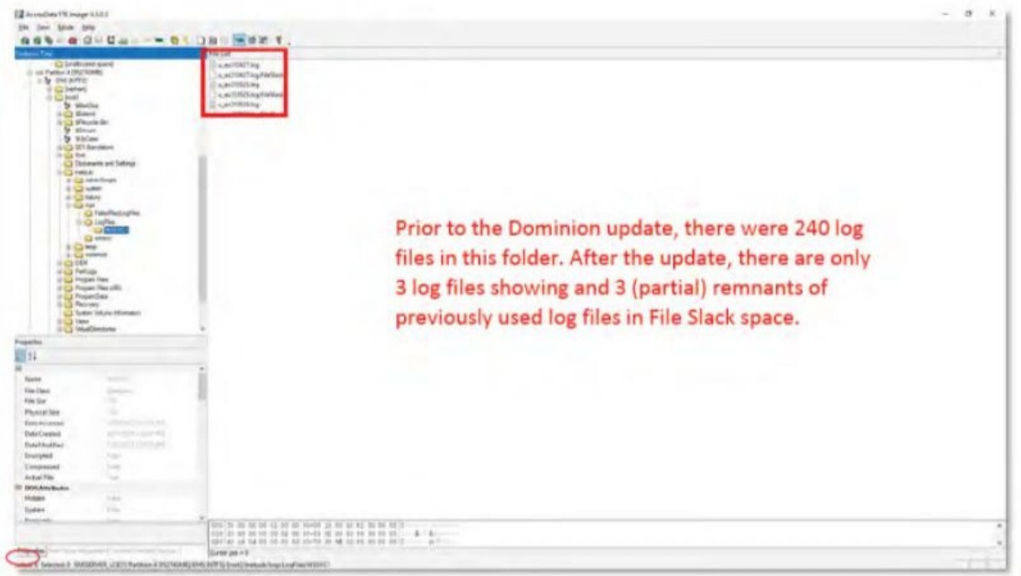

Figure 9 - EMS Server (5.13) Web Server Log Files After

The Key Objectives for this report were answered by this examination:

1. To determine whether D-Suite-implemented security requirements comply with the 2002 Voting System Standards (VSS)
    a. Uncertified software was used on the system rendering the certification of the entire system and all elections conducted with it, Invalid.
    b. Security protections required by law were almost completely absent
        i. Other than a userID and an easily guessed or bypassed password, no authentication was required
        ii. The firewall rule for access to the election database, ballots and results was unrestricted to any IP address in the world
        iii. Together with the firewall rule, Microsoft SQL Server Management Studio (SSMS) enabled complete access to the entire election databases – not just to the 2020 election but to the elections of June 2019 through May 25, 2021.
        iv. A self-signed encryption certificate was used introducing the potential for a man-in-the-middle attack
        v. Thirty-five wireless devices (802.11, Wi-Fi) were installed inside election equipment and an additional wireless device was identified in a connected printer
        vi. Any or all of these wireless devices could have connected to the Internet via the building wireless facilities
        vii. "Purging" (deletion) of critical Audit Log data, as specified by DVS and directed by the Secretary of State[75], destroyed all records of connection to the Internet or elsewhere, all record of user activity, including programs run by these users, errors, and any record of the addition or deletion of votes and the alteration of election results.
    c. **EACH of the compliance failures identified in 1.a. and 1.b. above are clear violations of the law.**

November 18, 2014

Conclusions

While the 4.14.A.1 build of the Democracy Voting System proved to mitigate four previously enumerated vulnerabilities, multiple medium and high vulnerabilities still exist within the suite of systems. A remote user could leverage most of the vulnerabilities across the network to obtain information about the system, voter ballots and results, or gain remote access to the system. If remote access is gained, recovery of user credentials through system memory (RAM) analysis could be executed and used to modify the backend database of the EMS Server.

Partial Manual Count

The Partial Manual Count (PMC) is a post-election audit of the electronic voting system used in an election to ensure the accuracy of the tabulation of the votes.[489] The PMC involves a manual count of all the races in at least one percent of the election precincts or in three precincts (whichever is greater) in which the electronic voting system was used.[490] The PMC must be conducted after every election that uses paper ballots that are counted with an electronic voting system. As a general rule, the general custodian of election records shall select the precincts at random.[491] However, in the general election for state and county officers, primary election, or an election involving a proposed amendment to the state constitution or other statewide measure submitted by the legislature, the Secretary of State shall select the precincts to be counted in the PMC.[492] For counties that participate in the Countywide Polling

Example: Kerr County TX

Please use a black or blue ink pen to mark your ballot. To vote for your choice in each contest, completely fill in the box next to your choice.
Favor de usar un bolígrafo de tinta negra o azul para marcar su boleta. Para votar por su selección en cada contienda, rellene completamente la casilla junto a su selección.

"I am a Republican and understand that I am ineligible to vote or participate in another political party's primary election or convention during this voting year."
"Yo soy Republicano y comprendo soy inelegible para votar o participar en la elección primaria o la convención de algún otro partido político durante este año electoral."

Preference for Presidential Nominee
You may vote for one presidential candidate whose name appears on the ballot by choosing the option to the left of the name of your choice or you may vote as uncommitted by choosing the option to the left of the choice "Uncommitted." Make only one choice.
Preferencia para un Candidato Nombrado para Presidente
Usted puede votar por un candidato para presidente cuya nombre aparece en la boleta escogiendo la opción al lado izquierdo del nombre que usted elija o usted puede votar como votante no comprometido escogiendo la opción al lado izquierdo de las palabras "no comprometido." Haga solamente una selección.

Proposition 5
Proposición 5
Texas parents or legal guardians of public school children under the age of 18 should be the sole decision makers for all their children's healthcare decisions including, but not limited to, psychological assessment and treatment, contraception, and sex education.
Los padres o tutores legales de menores de 18 años en las escuelas de Texas, deben ser los únicos responsables de tomar decisiones concernientes a la salud de sus hijos; incluyendo sin limitación a toma de decisiones para evaluaciones psicológicas, administración de tratamientos anticonceptivos y a recibir educación sexual.
- Yes / Si
- No / No

Proposition 6
Proposición 6
Texas should ban chemical castration, puberty blockers, cross-sex hormones, and genital mutilation surgery on all minor children for transition purposes, given that Texas children as young as three (3) are being transitioned from their biological sex to the opposite sex.
El Estado de Texas debe prohibir la castración química, los tratamientos hormonales para detener la pubertad, la administración de hormonas sexuales del sexo opuesto y la cirguía de mutilación genital con fines de transición sexual en todos los niños menores de edad, dado que, hay niños de Texas de tan solo tres anos de edad, que has sido expuestos a estas practicas de transición al sexo opuesto.
- Yes / Si
- No / No

Proposition 7
Proposición 7
Texans should protect and preserve all historical monuments, artifacts, and buildings, such as the Alamo Cenotaph and our beloved Alamo, and should oppose any reimagining of the Alamo site.
Los Tejanos deben proteger y preservar todos los monumentos históricos, reliquias y edificios, como el Alamo Cenotaph y nuestro querido Alamo y deben aponerse a cualquier cambio de imagen que se le quiera hacer a el Alamo.
- Yes / Si
- No / No

Proposition 8
Proposición 8
Texas election officials should heed the directives of the Office of the Governor to purge illegal voters from the voter rolls and verify that each new registered voter is a U.S. Citizen.
Los funcionarios electorales de Texas deben prestar atención a las instrucciones de la Oficina del Gobernador para eliminar del padrón electoral a personas ilegales y verificar que cada nuevo votante que se registre en el padrón electoral sea ciudadano estadounidense.
- Yes / Si
- No / No

Proposition 9
Proposición 9
Bail in Texas should be based only on a person's danger to society and risk of flight, not that person's ability to pay.
Las fianzas en el estado de Texas se deben fijar según el peligro que la persona represente para la sociedad y en la probabilidad de que la persona se de a la fuga y no, en la capacidad de pago de esta persona.
- Yes / Si
- No / No

Proposition 10
Proposición 10
Texas should limit our state legislators' terms to 12 years.
Texas debería limitar gestión de nuestros legisladores estatales a 12 años.
- Yes / Si
- No / No

County Completion Report

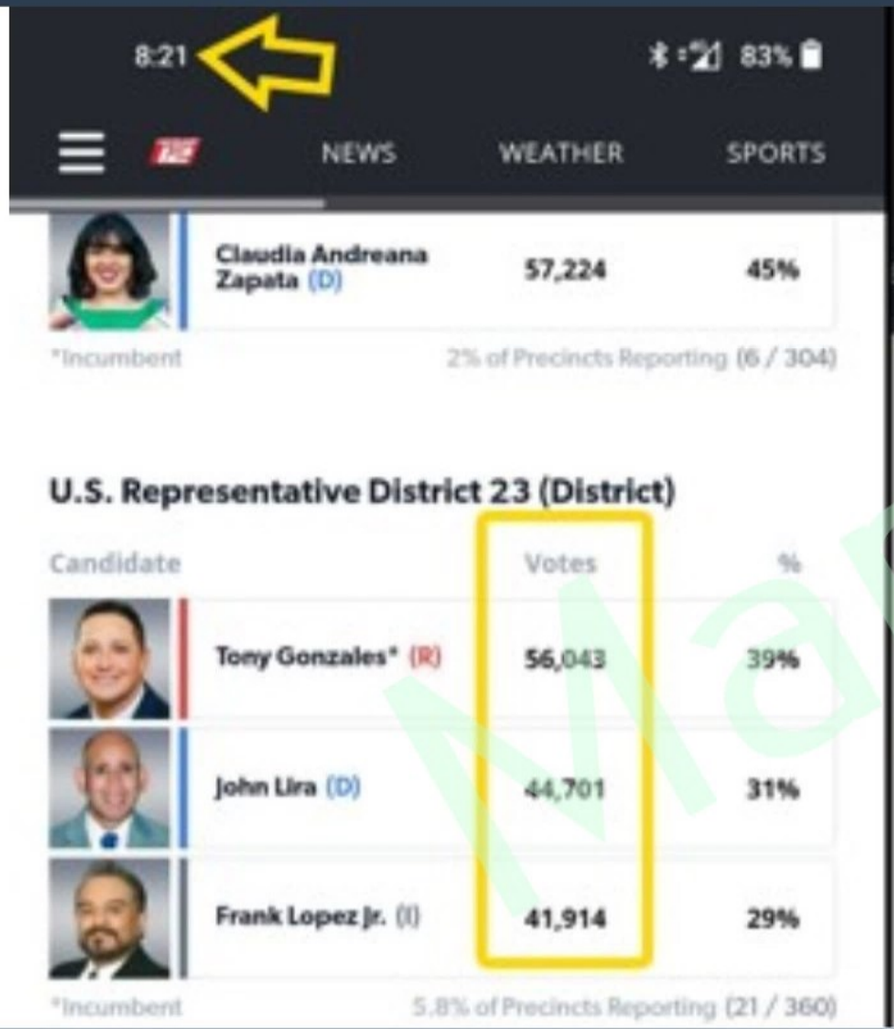

The majority of counties in Utah now vote by mail. Because any batch of ballots could include voters from multiple precincts, it is no longer helpful to track the number of precincts reporting to know when all votes have been counted.

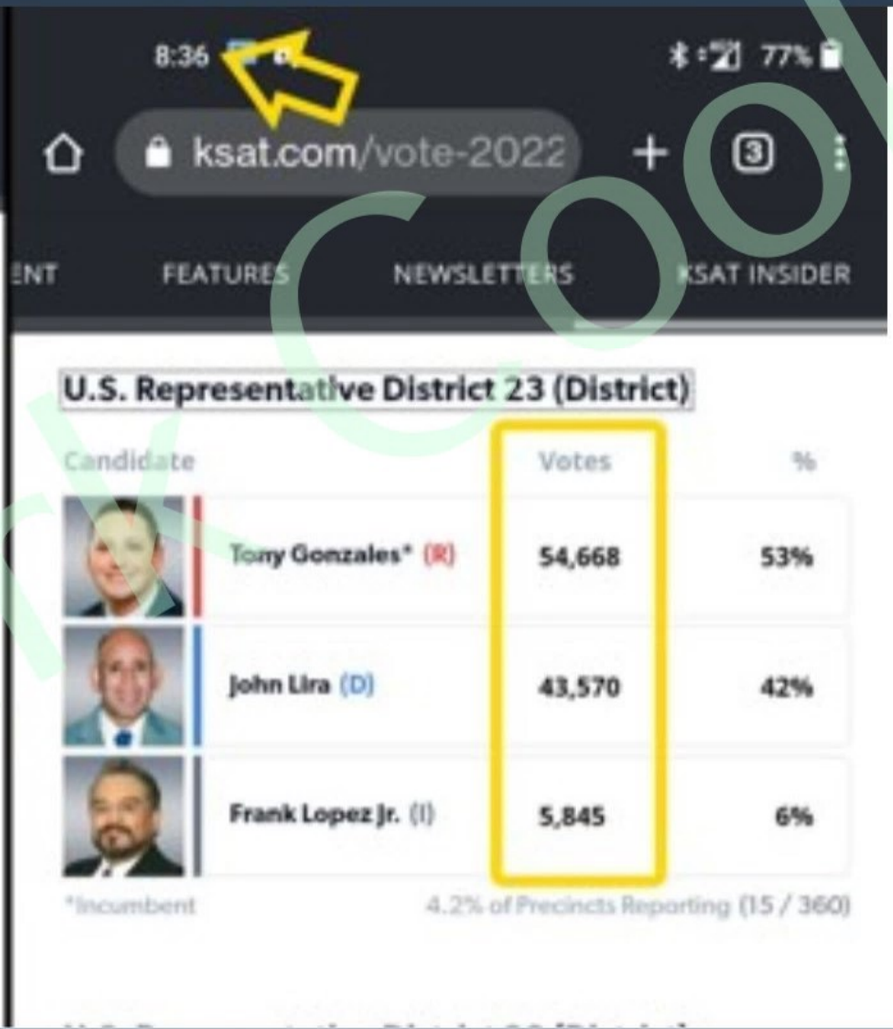

This page will indicate when each county has completed counting ballots on election night and each subsequent day when ballots are counted and results are released. For additional information on results displayed on this website please click here.

The New York Times

Where Georgia's Hand Recount Differed From the Initial Tally, by County

By Josh Holder and Amy Schoenfeld Walker Nov. 19, 2020

	INITIAL COUNT	AUDIT COUNT	DIFFERENCE
Joseph R. Biden Jr	2,473,383	**2,475,141**	+1,758
Donald J. Trump	2,459,825	**2,462,857**	+3,032
Margin	Biden +0.27	**Biden +0.25**	

On Thursday, Georgia's 159 counties finalized a hand recount, technically an audit, of the five million ballots cast in the election, reaffirming Joseph R. Biden Jr.'s victory but reducing his lead by more than 1,200 votes.

Georgia's secretary of state, Brad Raffensperger, a Republican, had ordered the manual audit as part of a new state law to ensure the accuracy of voting machines by comparing paper ballot counts with machine tallies. This was not an official recount, though the Trump campaign can choose to request one after the state's results are certified this week, as the vote margin between Mr. Biden and President Trump is below 0.5 percentage points.

In many counties, officials conducting the audit found zero or single-digit differences in their counts, and they will not change their original results for the state certification process. Yet at least four counties — Douglas, Fayette, Floyd and Walton — discovered missed ballots and will add these to their original counts.

In Douglas, Fayette and Walton Counties, the counting of paper ballots revealed that election workers had undercounted votes after missing memory cards, which held machine-cast votes. New voting machines adopted by the state in 2019 allow voters to use touchscreens to print ballots. The voters then verify the ballots and formally cast them by scanning, resulting in a paper record and a machine tally.

Floyd County officials discovered about 2,400 ballots that election workers neglected to rescan after a scanner failed and results could not be retrieved from memory cards. Officials attributed the error to "gross incompetence" on the part of the county's elections director.

Despite the errors in these four counties, election officials have said that there are no signs of voter fraud and that the new system is working as intended.

"These people are operating in it under the highest level of stress, in the most contentious election in their work life in the United States and in Georgia. So for the most part they are doing a really good job on this," said Gabriel Sterling, Georgia's statewide voting system implementation manager.

Discrepancies of over 100 Votes

DeKalb	308,769	58,438	D+560 votes

Kansans: Track your mail-in vote from start to finish

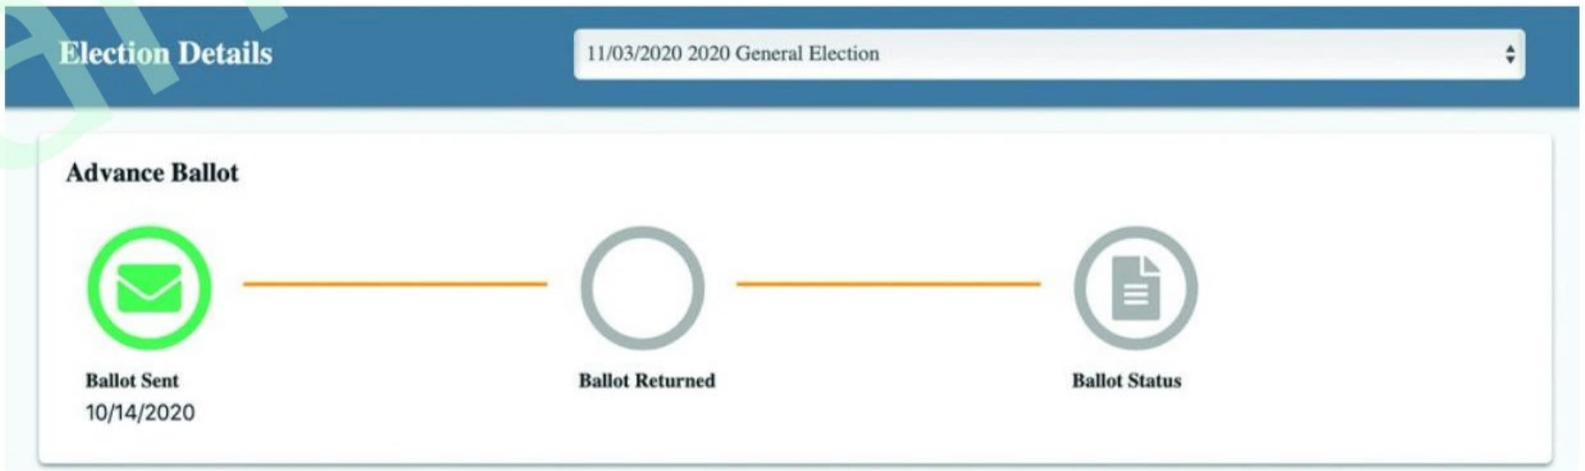

October 2, 2020 • 1 Comment • by The Leaven

KANSAS CITY, Kan. — Because of the pandemic, more Kansans than ever are expected to be voting by mail this coming election.

But for those worried about the process, the state is offering something new. Voters can track the progress of their vote online.

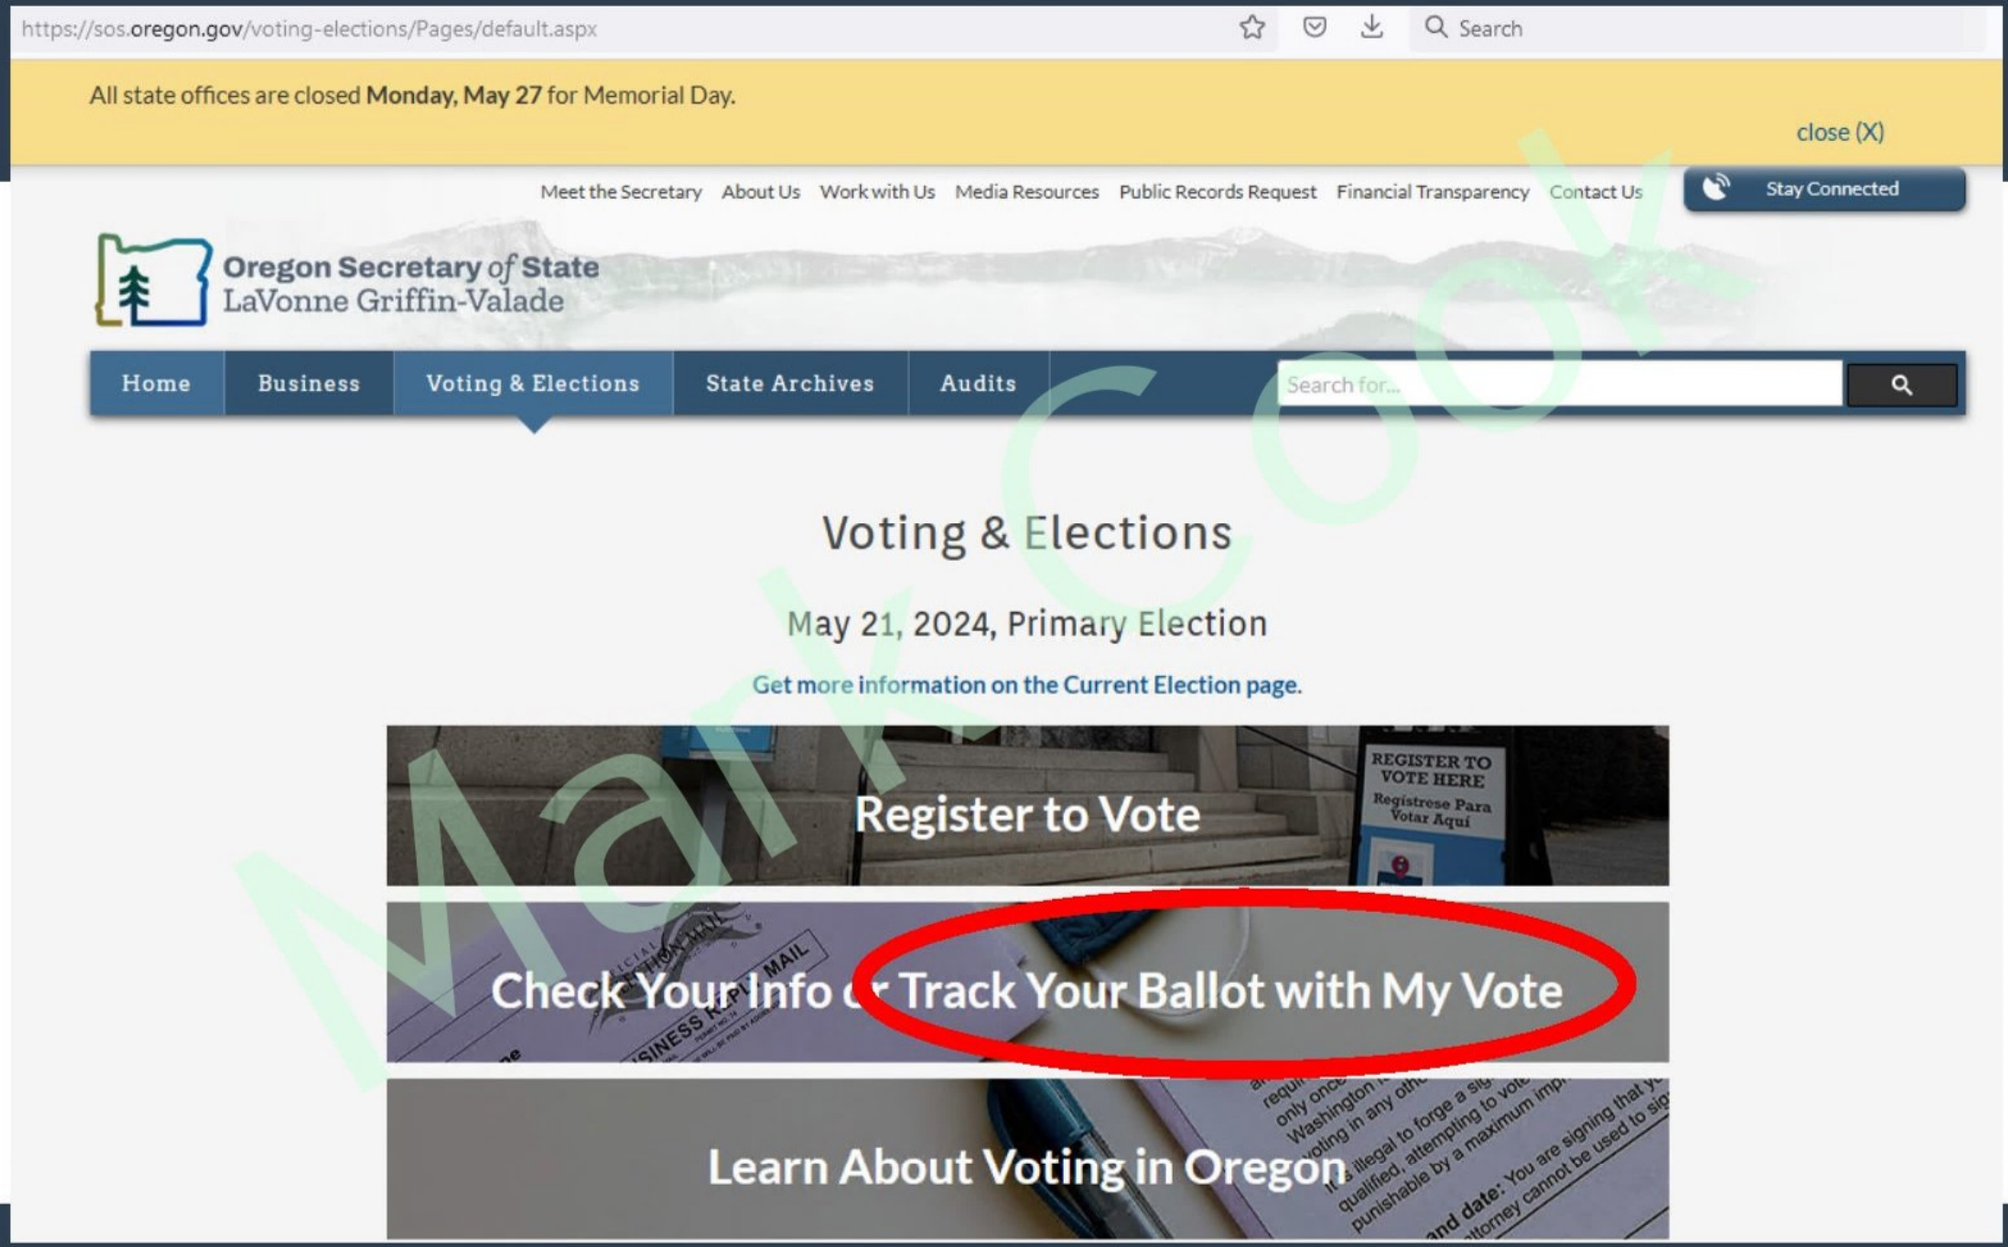

Advance voting by mail is nothing new for Kansas voters; they've been doing it since 1996. Nor do voters need an excuse to receive a vote-by-mail ballot.

Group asks BI: Stop Smartmatic, Comelec people from leaving PHL

By VIRGIL LOPEZ, GMA News

Published June 4, 2016 3:49pm

A poll watchdog group has asked the Bureau of Immigration (BI) to prevent 10 people from leaving the country for their alleged role in the controversial script change in the Comelec transparency server that receives precinct-level votes.

In a letter dated June 2, election watchdog "Mata sa Balota" urged BI Commissioner Ronaldo Geron to issue a hold departure order (HDO) against the following personalities:

advertisement

- Cesar Flores -Smartmatic-TIM president for Southeast Asia
- Heider Garcia- Smartmatic official
- Marlon Garcia - Smartmatic Philippines project manager
- Elie Moreno - Smartmatic project director
- Neil Banigued- Smartmatic technical support member
- Mauricio Herrera - Smartmatic technical support member
- Andres Kapunan- Smartmatic Mindanao
- Rouie Peñalba- Comelec IT personnel
- Nelson Herrera - Comelec IT personnel
- Frances Mae Gonzales- Comelec IT personnel

The group said these people are facing several criminal and administrative complaints filed before the Office of the Ombudsman, Manila Prosecutor's Office. They are also under investigation by the Comelec.

Tarrant County hires second elections administrator of the year

BY ANNA M. TINSLEY

UPDATED FEBRUARY 02, 2018 1:35 PM

In this short video, find out who can register to vote, where to register, which documents are needed and when you must register by to vote in the next election. BY LENA BLIETZ

Only have a minute? Listen instead
Powered by Trinity Audio
1.0x
00:00
02:37

For the second time this year, Tarrant County will have a new elections administrator.

Heider Garcia, elections manager in Placer County, Calif., has been hired to guide and oversee local elections.

He should join the county in mid-February to observe the March 6 primary election and help out as needed, Tarrant County Judge **Glen Whitley** said.

"We think he will be a good fit," Whitley said.

Garcia will be sworn in as elections administrator after the primary.

The delay is to give him time to become a registered voter in Tarrant County, which Whitley said he must do before he can be sworn in.

He replaces **Nathan Neblett**, a Houston man who held the post for two weeks in January before county officials decided to "release" him from the post.

"We just decided it wasn't going to be a good fit for us," Whitley said at the time. "We decided to go in a different direction."

hartintercivic.com/new-voting-machines-in-tarrant-county/

New voting machines in Tarrant County

September 3, 2019

Tarrant County voters will be casting ballots on new machines for this year's Nov. 5 constitutional amendment election.County Commissioners recently signed off on an $11 million plan to buy this new equipment, part of Austin-based Hart InterCivic's Verity line.

These machines, approved for use by the Texas Secretary of State's office, include a paper trail.

Voters will use a touchscreen to review the ballot and make their choices. The machine will print a list of the candidates chosen. After reviewing votes on the sheet, voters must put their paper ballot into one of the scanners to formally cast their vote and drop it into the ballot box.

Tarrant County Elections Administrator Heider Garcia has asked the state to allow countywide vote centers — which would let voters cast ballots at any polling place in the county on Election Day — as soon as the November election.

Tarrant GOP Denies County Turned Blue, Makes Trumpian Claims of Irregularities

LAUREN DREWES DANIELS | DECEMBER 1, 2020 | 4:00AM

The Tarrant County GOP is quite agitated the county has been cast as "blue" after the Nov. 3 general election. As mail-in ballots trickled in after Election Day, the seesaw tipped ever so slightly Democratic under the weight of about 1,826 more votes cast for the Biden/Harris ticket than Trump/Pence. It's not much, but this isn't horseshoes.

The county hadn't voted for a Democrat for president since 1964.

Assistant Elections Administrator

TARRANT COUNTY
ELECTIONS ADMINISTRATION

April 16, 2023

The Honorable Tim O' Hare
County Judge
100 East Weatherford St.
Fort Worth, Texas 76196

The Honorable GK Maenius
Tarrant County Administrator
100 East Weatherford St.
Fort Worth, Texas 76196

Gentlemen,

Please accept this letter as my formal resignation from the position of Elections Administrator for Tarrant County. My last day with the County will be June 23, 2023. This will allow sufficient time to complete all work related to the May 6 Joint Elections, any potential runoff elections in June and a smooth handover of the operation. It will be my utmost priority to guarantee operational continuity of the department before my departure.

GK, thank you for your leadership, your support, and your guidance in my time here. You believed in me and provided me all the tools I needed to do my job. I say to you what I said to Judge Glen Whitley when we canvassed the November 2022 election: "*Thank you for your leadership, and for just letting elections officials do their job and stay out of politics. That means the world to us.*" When leadership respects the team's values and shows trust, members of the team become the best version of themselves. You know this, Judge Whitley knew it, and because of that, I leave Tarrant County a better man and a better professional. Thank you, GK.

Judge O'Hare, my formula to "*administer a quality transparent election*[1]" stands on respect and zero politics; compromising on these values is not an option for me. You made it clear in our last meeting that your formula is different, thus, my decision to leave. I wish you the best; Tarrant County deserves that you find success.

Sincerely,

Heider Garcia
Elections Administrator
Tarrant County

Heider Garcia, celebrated elections chief from Tarrant County, set to run elections in Dallas

OCT. 18, 2023

Garcia will replace Michael Scarpello, who had led the elections department in Dallas since 2020.

BY **NATALIA CONTRERAS**, VOTEBEAT AND THE TEXAS TRIBUNE OCT. 18, 2023 UPDATED: 5 PM CENTRAL

Heider Garcia, the former Tarrant County elections administrator, speaks with ballot board workers inside the Tarrant County's central count station on election night on May 6, 2023. Garcia will oversee elections in Dallas County starting later this year. Azul Sordo for The Texas Tribune

Heider Garcia, a lauded Texas election official who resigned as elections director in Tarrant County under political pressure last spring, is set to become Dallas County's next elections chief.

Garcia's first day will be Dec. 20, Dallas County officials said during an election commission meeting Wednesday.

The announcement comes two weeks after Michael Scarpello, who has been Dallas County elections administrator since 2020, submitted his resignation and said he'd be retiring after working in elections in various jurisdictions across the country for more than 20 years. Scarpello's last day will be Dec. 19.

"I am honored," Garcia said in a text message Wednesday, after his appointment. "I'll be very humble in my new role and work really hard to follow in Michael's footsteps. Dallas deserves the best and I intend to work with that goal in mind."

Garcia, one of the most respected elections directors in the state during his time in Tarrant, had been Tarrant County's elections administrator since 2018. Since former President Donald Trump began to make baseless allegations of fraud in connection with the outcome of the 2020 election, Tarrant County — the state's most populous swing county — has been at the center of unfounded election fraud conspiracies.

Garcia, who previously worked as a software engineer for the voting machine company Smartmatic in Venezuela, also became the subject of allegations from some voter fraud activists and Trump allies who claimed he'd "rigged" the Tarrant election. Fringe activists began posting Garcia's home address online. He faced harassment and racist death threats.

THEN IMMEDIATELY progress to:

Background Checks on Election/Adjacent-Individuals

Fully Transparent, Accurate, Verifiable,
County-Managed Nationally Cross-Referenced Voter Registration System
Paper Poll Books, HAND MARKED Ballots,
PRECINCT-BASED HAND COUNT ELECTION DAY
that is Understandable by and Accessible to
Every American Citizen
