Executive Order Proposed to Protect America's Elections

An elite cadre of grassroots election experts, driven by an unyielding passion for truth, worked in the shadows to forge a bold and comprehensive plan for returning elections to the people, securing the people's vote, and shielding our Constitutional Republic from the threat of election tampering. Titled "Establishing Security, Integrity, and Transparency for United States Elections with Protections Against Foreign Interference," this proposed executive order confronts mounting threats to the democratic process head-on, ensuring every American's vote is protected from foreign manipulation and domestic fraud.

Since election infrastructure was deemed critical in 2017, evidence of exploited vulnerabilities—ignored by some officials—has grown. Building on Executive Order 13848 (2018), this proposal declares a national emergency to safeguard the electoral process. Elections are the bedrock of our Constitutional Republic. This order ensures that every legal vote counts and that no interference can silence the American people.

The plan restores trust by returning control to local communities, with voters using hand-marked, hand-counted paper ballots at their local precincts. It eliminates risks inherent in electronic voting systems and establishes ironclad protections against fraud. This proposed Executive Order will remain in place until Congress and the states enshrine these standards into law.

Core Safeguards:

- **Impenetrable Security:** Votes are cast on secure, U.S.-made paper ballots with anti-counterfeit features like watermarks, then hand-counted at precincts of up to 1,500 voters—fully observable by the public.
- **Verified Voters:** Proof of citizenship and residency, backed by free federal data access, ensures only eligible Americans vote. Unique voter IDs and PINs make registration secure and trackable.
- **Unmatched Transparency:** Hand counting stations and results are video-recorded and posted publicly, with all records—ballots, voter lists, videos—open for inspection.
- **Fraud Prevention:** Counties will re-register voters for 2026, purging invalid entries, while ongoing verification keeps rolls accurate.
- **Accessible to All:** Election Day becomes a national holiday, military and overseas ballots are expedited, and disabled voters choose their own assistants.

This order goes further: it bans drop boxes, limits absentee voting to verified cases, and ends private election funding—steps that rebuild public confidence. A new White House Office of Federal Election Security will support counties and states in implementing these changes seamlessly.

"Our Constitutional system of representative government only works when the worth of honest ballots is not diluted by invalid ballots procured by corruption." -Federal Prosecution of Election Offenses, Eighth Edition.
