Cold Hard Reality

You can't win a war if you don't know you're in one.

You can't win a war if you don't know the goals of your enemy.

You can't win a war if you don't know the tactics of your enemy.

You can't win a war if you don't know the tools of your enemy.

You can't win a war if you have no strategy.

You can't win a war if you use inferior weapons.

The Election Illusion

We won a Battle

We lost Strategic Positions Nationwide

We are being set up. These people aren't stupid

We don't know what the Results really are

Audits won't give us the true Results, but may expose the joke

Election Control

WE ARE COMING TO YOU!

Current Mission: Ensure that our elections accurately and verifiably represent the will of the people. Yes, even post 2024 Election! We MUST fix our entire Election System. HCRS Round 2 hits the road in May 2025 on another multi-year journey around the Country. Donations are needed and welcome to fuel this next trip. And if you are in Colorado until then, I am happy to present <u>in person</u> before May. And if you are outside of Colorado, I can still present remotely! Scroll down to see what events are lined up so far.

Goal: Personal visits to counties to educate and offer advice to help fortify the security, accuracy, and verifiability of each County's upcoming Election. Click here to see the entire solution we will be helping implement.

At Each County:

- Public Election Integrity Briefing to explain the Election Ecosystem, Vulnerabilities, and both Short and Long Term Mitigation
- Meetings with local Grass Roots, Election Officials, Commissioners, Sheriffs, and other Countywide and City
 officials to answer questions and provide suggestions on paths to reclaiming county control and securing
 their elections
- Recruiting Citizens committed to working the elections
- · Bonus that you will find out in person

Scope

At the heart of democratic governance lies the voting system, a mechanism designed to reflect the collective will of the people. For this system to truly serve its purpose, it must be **so simple and transparent** that **every citizen**, regardless of their background, education, or technological literacy, can not only participate but also **understand and verify every step** of the process. This simplicity and transparency are not just about ease of use; they are fundamental to **ensuring equal access** to the electoral process. If the mechanics of voting are shrouded in complexity or lack transparency, trust in the electoral outcome diminishes, eroding the foundation of our republic. At its essence, voting involves citizens marking their choices on paper, followed by a straightforward count of these marks. This process doesn't necessitate elaborate or costly technology; instead, it demands clarity, accessibility, and the ability for public oversight. For American citizens to genuinely reclaim their electoral process, immediate and comprehensive reforms are imperative. Here's what we must implement:

Voter Registration

- Every 2 year
- . In-person at the county
- · Verified citizen and residency check at that time
- On a paper voter registration card
- · Witnessed signature
- · Stored by voting precinct
- A read-only standardized digital list of registered voters is provided by every county on their website to share with the citizens and all other counties
- Each county cross-references their list against all other counties. Paper poll books for each precinct are created from registration cards prior to every election

Absentee Ballots

- · Limited to as-needed basis
- · Proof must be provided and accepted
